Methodist Education in Peru Rosa del Carmen Bruno-Jofra (c) 1988-06-22 With research based on extensive primary sources, the author examines the activities of the Methodist mission in Peru, in particular its educational work, within the Peruvian socioeconomic formation and its ideological and intellectual changes. Yet her study goes beyond Methodist boundaries: Social Gospel doctrine and educational theory, which link American Progressivism (especially John Dewey's pedagogical ideas) with Christianity, are also treated at an interdenominational level. The book contends that Methodist schools constituted an educational system of their own within a socioeconomic formation of uneven character, a society where an imperialist presence was interwoven with pre-capitalist as well as local incipient capitalist forms. The author's analysis of the political dimension of missionary work—from the quest for religious freedom to the attempt to exert influence on social movements—leads her to consider the relationships among APRA leaders, the missionaries, and the interdenominational Committee on Cooperation in Latin America. Bruno-Jofré argues that Social Gospel doctrines, although couched in reformist language, were ultimately a vehicle of North American theology. This book presents a refreshingly wide perspective on the development of education in the Third World as affected by missionary bodies from the First World.

TIMSS 2007 Wilfried Bos 2008 Im Jahr 1995 beteiligte sich Deutschland erstmals mit TIMSS (Third International Mathematics and Science Study) an einer international vergleichenden Schulleistungsstudie. Untersucht wurden damals die mathematischen und naturwissenschaftlichen Kompetenzen in den Sekundarstufen I und II. Die Resonanz auf die Ergebnisse war erheblich, denn die Leistungen der Schülerinnen und Schüler befanden sich im internationalen Vergleich nicht - wie erwartet - an der Spitze. Eine Folge davon war die regelmäßige deutsche Beteiligung an internationalen Schulleistungsstudien im letzten Jahrzehnt. Mit TIMSS 2007 (Trends in International Mathematics and Science Study) nimmt Deutschland erstmalig an einem grundständigen internationalen Vergleich der Grundschulen in den Bereichen Mathematik und Naturwissenschaften teil. Ein internationaler Kreis von Experten hat Tests entwickelt, die die nationalen Curricula der Teilnehmerstaaten berücksichtigen. Unter Bezugnahme auf verschiedene Inhaltsgebiete und kognitive Anforderungsbereiche wird so ein detaillierter Blick auf die Leistungsfähigkeit der Grundschulen der verschiedenen Staaten möglich. Population Mobility in Developing Countries Ronald Skeldon 1990 The thesis of this study is that the forms of population migration change systematically over periods of time and from area to area. Using data from several parts of the world, the author shows how population mobility is linked to wider social, economic and political change, and that it is closely related to such processes as the rise of nationalism. He draws comparisons between the historical experience of Europe and patterns in today's developing world. The book is divided into three parts. Part I examines the problem of the measurement of population movements and reviews studies of mobility based mainly on the historical record. This part is concerned with the patterns of mobility in pre-industrial and early industrializing societies as a basis of comparison with more recent patterns. The specific focus is on mobility and the peasantry in order to examine critically the notion that peasants either are or were mobile. Part II contains detailed descriptions of migration in a number of countries, particularly Peru and Papua New Guinea. The author looks back on earlier work and attempts to review earlier conclusions in the light of recent research and data. Part III deals with certain changes that occur in the way they do. The central theme is the penetration of a European-dominated system and the two-way relationships between the factors giving rise to particular patterns of mobility and the effect that these patterns of mobility have on society and the economy. A separate chapter examines the ability of governments or other institutions to guide the changes in particular directions through migration policy.

Producing Against Poverty Johanna Louisa Ypeij 2000 Producing against Poverty is an anthropological

research on micro-entrepreneurs in Lima, Peru. It analyses the way micro-producers accumulate capital. The anthropological approach of the book starts with an analysis of the daily lives of the micro-producers. Its gender approach makes a comparison between the position of men and women throughout its argumentation. The author also analyses the conditions of labourers working for micro-producers. By paying extensive attention to the subcontracting links between micro-production and the large scale production process, she carefully builds up to general conclusions which go way beyond the micro level of analysis. Micro-production reproduces poverty by subordinating important participants of the production such as women and labourers. The ultimate conclusion is that the informal sector grows not only in times of economic recession, but also in times of economic growth.

El huracan lleva tu nombre es una singular historia de amor, dolorosa y gozosa a la vez, con una heroina, Sofia, que fascina por su capacidad de amar, y con un original antiheroe, el narrador, Gabriel, que expone al lector su conflicto a traves de una sinceridad a veces hilarante y a veces conmovedora. Una novela que no va a dejar a nadie indiferente.

A Buccaneer's Atlas Basil Ringrose 1992-01-01 On July 29, 1681, a band of English buccaneers that had been terrorizing Spanish possessions on the west coast of the Americas captured a Spanish ship, from which they obtained a derrotero, or book of charts and sailing directions. When they arrived back in England, the Spanish ambassador demanded that the buccaneers be brought to trial. The derrotero was ordered to be brought to King Charles II, who apparently appreciated its great intelligence value. The buccaneers were acquitted, to the chagrin of the king of Spain, who had the English ambassador expelled from the court at Madrid on a seemingly trumped-up charge. The derrotero was subsequently translated, and one of the buccaneers, Basil Ringrose, added a text to the compilation and information to the Spanish charts. The resulting atlas, consisting of 106 pages of charts and 106 pages of text, is published in full for the first time in this volume. Covering the coast from California to Tierra del Fuego, the Galapagos, and Juan Fernandes, Basil Ringrose's south sea waggoner is a rich source of geographical information, with observations on navigational, physical, biological, and cultural features as well as on ethnography, customs, and folklore. After almost exactly three hundred years, this secret atlas is now made available to libraries and individuals. The editors have provided an extensive introduction on historical, geographical, and navigational aspects of the atlas, as well as annotations to the charts and text, and they have plotted the coverage of the charts on modern map bases. The Autobiography of María Elena Moyano María Elena Moyano 2000 "Moyano's life exemplifies the overwhelming obstacles that poor barrio women experience not only in Peru but also in other third world countries. This autobiographical book adds important information to several different disciplines: Latin American politics, feminism, sociology, and current Peruvian history. . . . Edmisten's expertise is obvious in the scholarly introduction and readable translation."--Mary H. Wilgus, *Campbellsville University Using María Elena Moyano's own words, the editor of this poignant story has re-created the voice of the martyred Peruvian activist. In 1992, at age 33, Moyano was assassinated by guerrillas of the revolutionary movement Sendero Luminoso (Shining Path). Her murder--a warning to others in the women's movement--galvanized the Peruvian people against Sendero Luminoso and its leader, Abimael Guzmán Reynosa. In part 1 of this work, Moyano traces the struggle of poor women in Peru and how they developed survival organizations such as the Vaso de Leche (Glass of Milk) and the communal kitchen feeding program to cope with poverty made worse by government austerity adjustments. Like other women, Moyano honed her leadership skills in these programs. She condemned the terrorist tactics of Sendero Luminoso and publicly proclaimed that they were not on the side of the poor. She also condemned the human rights abuses of the military and police. In part 2, Moyano relates the hardships of her impoverished childhood and describes the difficulties of achieving an education. She speaks also of her marriage and of childbirth, of the discrimination she faced, and of her gradual and steady rise to positions of authority within the popular women's movement and as deputy mayor and spokesperson for the 300,000 people of Villa El Salvador, a Lima barrio. As a woman of color, Moyano led a revolution of conscience within a larger revolution. Through this gracefully translated book, her voice continues to speak for all women who refuse to relinquish the struggle for dignity, freedom, and equal political participation. All royalties from this book will go to the Flora Tristán Center for the Peruvian Woman. Diana Miloslavish Tupac studied literature at the National University of San Marcos in Lima. She went to Mexico to participate in a study on ethnic minorities and human rights, and there she became a member of the Mexican Solidarity Committee for Guatemalan refugees. Upon her return to Peru, she rejoined the Flora Tristán Center for the Peruvian Woman. Patricia S. Guaman Poma Y Su Cronica Ilustrada Del Peru Colonial Rolena Adorno 2001 Published on the occasion of the opening of the full digital edition of the autograph manuscript of Felipe Guaman Poma de Ayala's Nueva corónica y buen gobierno (1615) on the website of the Royal Library, Copenhagen, this new book by one of the world's most prominent Guaman Poma-scholars contains a survey (in English and in Spanish) of recent research. Guaman Poma dedicated his Chronicle to Philip III, King of Spain, but it has been preserved since the 18th century in the Royal Library, Copenhagen. 'Rediscovered' by modern scholarship in 1908, it was included in UNESCO's 'Memory of the World' list in 1999. Written and illustrated by a Christianised native Andean of Southern Peru, several decades after the Spanish conquest, the Nueva corónica is a complex and unique mixture of historiography and utopianism. On one hand, it contains an entirely original framework for Andean historical self-understanding, as an alternative to the colonial viewpoint. On the other hand, based upon vivid written and graphic descriptions of Andean daily life and sufferings under colonial rule, Guaman Poma formulates far-reaching proposals for reform aimed at turning the chaotic viceroyalty into a dynamic self-governed kingdom within the Spanish empire. Guaman Poma envisioned this new order as Christian, but organised in accordance with Andean economic, social, and cultural tradition.

Guaman Poma Rolena Adorno 2000-12-15 In the midst of native people's discontent following Spanish conquest, a native Andean born after the fall of the Incas took up the pen to protest Spanish rule. Felipe Guaman Poma de Ayala wrote his Nueva coronica y buen gobierno to inform Philip III of Spain about the evils of colonialism and the need for governmental and societal reform. By examining Guaman Poma's verbal and visual engagement with the institutions of Western art and culture, Rolena Adorno shows how he performed a comprehensive critique of the colonialist discourse of religion, political theory, and history. She argues that Guaman Poma's work chronicles the emergence of a uniquely Latin American voice, characterized by the articulation of literary art and politics. Following the initial appearance of Guaman Poma: Writing and Resistance in Colonial Peru, the 1990s witnessed the creation of a range of new studies that underscore the key role of the Nueva coronica y buen gobierno in facilitating our understanding of the Andean and Spanish colonial pasts. At the same time, the documentary record testifying to Guaman Poma's life and work has expanded dramatically, thanks to the publication of long-known but previously inaccessible drawings and documents. In a new, lengthy introduction to this second edition, Adorno shows how recent scholarship from a variety of disciplinary perspectives sheds new light on Guaman Poma and his work, and she offers an important new assessment of his biography in relation to the creation of the Nueva coronica y buen gobierno.

Creating the Hybrid Intellectual Anne Lambright 2007 This book is a path-breaking contribution to the study of the enigmatic Peruvian anthropologist and creative writer, Jose Maria Arguedas. Not only the first book-length study on this important Latin American writer in English, this study also gives us a new way to read Latin American indigenista and neo-indigenista writing, by insisting on linking a reading of gender and gendered categories in Arguedian narrative with a reading of race and ethnicity. Lambright asserts that it is through reading the role and trajectory of the feminine in Arguedian narrative that we can best understand the author's national vision. Lambright's analysis also identifies and theorizes a less-studied subject capable of understanding, mediating, and expressing white, mestizo, and indigenous cultures. Using theories of gender, race, nationness, and radical geography, Lambright shows how Arguedian narrative creates new mappings of Peru that contest dominant understandings of the same, and how the hybrid intellectual moves among spaces and national subjects that resist and provide alternatives to an oppressive dominant culture.
