The Ultimate Guide to Becoming a CRNA Paul Atkins 2020-07-03 Nurse

anesthetists work closely with surgeons and physicians to provide pain-free, safe treatment to patients around the world. Nurses were the first to administer anesthetics to wounded soldiers during the United States Civil War (1860-1865) and continue to be the primary anesthesiology to U.S. military servicemembers around the world. The Certified Registered Nurse Anesthetist (CRNA) is one of the more difficult certifications an RN can receive, requiring years of post-graduate study and clinical experience. Students entering CRNA programs today will graduate with the title "Doctor of Nursing Practice," the highest scholastic award available to nurses. Becoming a CRNA is a long and arduous journey that begins with admission to one of the nation's colleges with CRNA programs. Acceptance in a program is limited to those with superior scholastic records and experience in the delivery of intensive or critical care. Paul Wilkins, a practicing CRNA, has written a comprehensive reference guide about the profession, its future, and its rewards and disadvantages. Readers interested in a career as a nurse anesthetist will find his advice about selecting and applying to a CRNA school invaluable as many consider admission to be more difficult than entering medical school.

As a successful graduate of nurse anesthesia school, I will provide some insight into what it takes to go from a student to a CRNA. Some of these things I learned while I was in school, while others I picked up on after I started working as a nurse anesthetist. It was not an easy road for me, and it won't be for you either. But I hope you can learn from my mistakes and perhaps some of the bumps along the way will be a little smaller. The aim of this book is not to teach you anesthesia itself. Nursing Professionals Kezia Endsley 2020 "Nursing Professionals, which includes interviews with professionals in the field, covers the following areas of this field that have proven to be stable, lucrative, and growing professions. RNs, LPNs, Nurse Practitioners, Nursing Assistants, Orderlies"--

Certified Registered Nurse Anesthesia: Critical Care Nursing in the Operating Room, An Issue of Critical Care Nursing Clinics, Holly-May Robins 2015-04-07 APRNs are essential to deliver healthcare in today ' s complex environment. Certified Registered Nurse Anesthetists have met that challenge for over 150 years. Nurse Anesthetists have shifted from the intensive care unit as critical care nurses into the operating room arena. The operating room is an environment that is uniquely challenging. A critical care background is essential to meet these challenges, and all Certified Registered Nurse Anesthetists share that experience. The topic; "Certified Registered Nurse Anesthesia: Critical Care Nursing in the Operating Room", highlights critical care nursing as it is applied in the operating room setting. Critical care nurses will appreciate the knowledge base that is essential for the anesthetist. As healthcare reform demands greater efficiency, more and more procedures are performed outside the operating room. The line between the Operating Room, ICU and Interventional Radiology will become less defined. Critical care nurses are, and will be more involved in patient care while an anesthetic is administered. It is the goal of this proposed monograph to share knowledge and experience so that ICU nurses will learn more about caring for the anesthetized patient.
