The RoutledgeFalmer Reader in Gender & Education Madeleine Annot 2006-09-27 This new Reader brings together classic pieces of gender theory, as well as examples of the sophistication of contemporary gender theory and research methodologies in the field of education. Leading international gender researchers address current debates about gender, power, identity and culture and concerns about boys' and girls' schooling, gender achievement patterns, the boys' education debate, and gender relationships in the curriculum, the classroom and youth cultures. The Reader is divided into six sections which reflect contemporary concerns about Gender and Education: Gender and Educational Theory Difference and Power Identity Work Knowledge and Pedagogy Reflexivity and Risk Gender and Citizenship. A specially written Introduction from the editors, both experts in feminist and masculinity research, provides a much-needed context to the current educational climate. Undergraduates, postgraduates and academics interested in education, gender studies and women's studies will find this a stimulating and important resource. The analysis of the gender dimensions of the curriculum, teaching and alternative pedagogies also provide important insights for practitioners wishing to promote gender equality.

Maths Tutor: GCSE Maths Tutorials, Foundation Level - DVD-RO 2011-11

New Scientist 1996

Race, Gender and Educational Desire Heidi Safia Mirza 2008-11-19 'This book is a great genealogy of black women's unrecognised contributions within both education and the wide social context. I think it constitutes an important piece of work that is totally missing from the existing literature' - Diane Reay, Professor of Education, Cambridge University Race, Gender and Educational Desire reveals the emotional and social consequences of gendered difference and racial division as experienced by black and ethnicised women teachers and students in schools and universities. It explores the intersectionality of race and gender in education, taking the topic in new, challenging directions and asking How does race and gender structure the experiences of black and ethnicised women in our places of learning and teaching? Why, in the context of endemic race and gender inequality, is there a persistent expression of educational desire among black and ethnicised women? Why is black and ethnicised female empowerment important in understanding the dynamics of wider social change? Social commentators, academics, policy makers and political activists have debated the causes of endemic gender and race inequalities in education for several decades. This important and timely book demonstrates the alternative power of a black feminist framework in illuminating the interconnections between race and gender and processes of educational inequality. Heidi Safia Mirza, a leading scholar in the field, takes us on a personal and political journey through the debates on black British feminism, genetics and the new racism, citizenship and black female cultures of resistance. Mirza addresses some of the most controversial issues that shape the black and ethnic female experience in school and higher education, such as multiculturalism, Islamophobia, diversity, race equality and equal opportunities Race, Gender and Educational Desire makes a plea for hope and optimism, arguing that black women's educational desire for themselves and their children embodies a feminised prospectus for a successful multicultural future. This book will be of particular interest to students, academics and researchers in the field of education, sociology of education, multicultural education and social policy. Heidi Safia Mirza is Professor of Equalities Studies in Education at the Institute of Education, University of London, and Director of the Centre for Rights, Equalities and Social Justice (CRESJ). She is also author of Young, Female and Black (Routledge).

Cdr Dummy Case Penguin Books, Limited 1999-03-01

Which Way Social Justice in Mathematics Education? Leone Burton 2003 Explores the issues of social justice and equity in mathematics classrooms throughout the world.

Analysing Underachievement in Schools Emma Smith 2005-06-09 Underachievement in school is one of the most widely used terms in education today. As a discourse it has been responsible for influencing government policy, staffroom discussions, as well as the pages of academic journals and the TES. It is also a subject which raises questions about what we expect from a fair and equitable education system. This book provides a critical analysis of two sides of the underachievement debate, at each of the three levels of focus - international, the UK and the individual. On the one hand, it will consider the 'crisis' account; of falling standards and failing pupils and, on the other, present an alternative account, which urges a re-evaluation of the underachievement debate in order to consider who might be underachieving and why.

The British National Bibliography Arthur James Wells 2007

Alternatives Within the Mainstream Dimple Godiwala 2008-12-18 Alternatives Within the Mainstream: British Black and Asian Theatres is the first comprehensive collection of critical essays on the subject. Edited by Dimple Godiwala, the anthology is in six parts: A lengthy Introduction is followed by Part II (Histories and Trajectories) which contains chapters which survey the work of the Black Theatre Forum and the histories of Black and Asian theatres in Britain. Part III (Histories of Theatre Companies and Arts Venues) charts brief histories of the major theatre companies, Talawa, Tara and Tamasha and contains a survey of Birmingham's changing arts venues. Part IV called simply Controversies is a document of the Sikh diaspora's uproar over Behzti and issues of censorship. Part V (The Dramatists) critically explores the work of several dramatists such as Killion M. Gideon, Liselle Kayla, Roselia John Baptiste, Trish Cooke, Zindika, Jackie Kay, Valerie Mason-John, Wole Soyinka, Sol B. River, Roy Williams, Kwame Kwei-Armah, Anu Kumar, Rukhsana Ahmad, Bettina Gracias, Bapsi Sidhwa, Tanika Gupta, Deepak Verma, Gurpreet Kaur Bhatti and Yasmin Whittaker Khan. Part V (Theatre Voices) consists of autobiographical essays by some of Britain's theatremakers. This contains contributions by Jatinder Verma, Yvonne Brewster, Sol B. River, Valerie Mason-John, Bapsi Sidhwa. A long overdue book which examines in imaginative depth the 'universe inside' an often trivialised area of British theatre. Alternatives Within The Mainstream provides serious academic opinion and detailed textual analysis in abundance. The book's impressive collection of facts and analyses challenge the culture of myth which too often obscures the relevance of Black and Asian work. There are also many absorbing revelations: did you know, for instance, that Ignatius Sancho was Garrick's friend? Yvonne Brewster

Cdr Dummy Case Penguin Books, Limited 1999-03-01

Debates in Mathematics Education Gwen Ineson 2020-06-15 This new and updated second edition of Debates in Mathematics Education explores the major issues that mathematics teachers encounter in their daily lives. By engaging with established and contemporary debates, this volume promotes and supports critical reflection and aims to stimulate both novice and experienced teachers to reach informed judgements and argue their point of view with deeper theoretical knowledge and understanding. Divided into five accessible sections, this book investigates and offers fresh insight into topics of central importance in mathematics education, with this second edition including new discussions and chapters on: Classic and contemporary issues of pedagogy, politics, philosophy and sociology of mathematics education International comparisons of achievement Digital technologies for teaching Mastery in mathematics Pop culture and mathematics Whether mathematics can be harmful Designed to stimulate discussion and support you in your own research, writing and practice through suggested questions and activities throughout, Debates in Mathematics Education will be a valuable resource for any student or practising teacher, and those engaged in initial teacher education, continuing professional development or Master's level study. This book also has much to offer to those leading mathematics departments in schools and initial teacher education programmes, and to beginning doctoral students looking for a survey of the field of mathematics education research.

OCR GCSE Computer Science, Second Edition George Rouse 2020-08-03 Written by leading Computer Science teachers, this brand-new textbook will guide students through the updated OCR GCSE Computer Science specification topic by topic, and provide them with standalone recap and review sections, worked examples and clear explanations of complex topics. This Student Book: develops computational thinking skills in line with the new Practical Programming element of Component 02 provides differentiated material with the 'beyond the spec' feature includes standalone recap and review sections at the end of each chapter includes answers to the Knowledge Check questions to support independent learning provides definitions of technical terms, along with a glossary of words that will be needed for assessment. Looking for answers for the Student Book? They can be found at the back of the print textbook. You can now access a free set of practice questions on the Hodder Education website. Please note, these questions are not endorsed by OCR and have not been subject to any OCR quality assurance processes. George Rouse, Lorne Pearcey and Gavin Craddock are highly respected and widely published authors of resources.

Prison Writing Julian Broadhead 2002-06-01 Reviews of the previous edition: 'A remarkable anthology which will interest everyone concerned with the fate of prisoners

and anxious to see their conditions improved': Michael McMullan, *Justice of the Peace*. 'This fascinating and very readable collection of fact, fiction and verse is the fifteenth issue edited and produced by two probation officers from Sheffield. We are fortunate that they have found a new publisher in Waterside Press to continue giving prisoners (and others), an opportunity to do something which all writers crave - find an audience to communicate their feelings and experiences... The contributors give deeply personal insights into the nature of their world and prove that imagination and talent are incapable of being destroyed if people are ready to develop them... This anthology deserves to be read... by everyone who is interested in new writers experimenting with the development of their talent. Each piece is different and compelling: David Underhill, *The Magistrate*. This 16th edition is an entirely new collection of writings by prisoners and other people connected with prisons, from the United Kingdom and beyond.

JACT Bulletin Joint Association of Classical Teachers 1999

Educational Leadership Steven J Courtney 2017-08-10 *Educational Leadership* brings together innovative perspectives on the crucial role of theory and theorising in educational leadership at a time when the multiple pressures of marketisation, competition and system fragmentation dominate the educational landscape. This original and highly thought-provoking edited collection is a much-needed counterbalance to the anti-theoretical trends that have underpinned recent education reforms. Contributors employ a range of theories in original and innovative ways in order to reveal the lived experiences of what it means to be an educational leader at a time of rapid modernisation, where the conceptual terrain of 'modern' has been appropriated by corporate and private interests, where notions of 'public' are not only hidden, but also derided, and where school leaders must meet the conflicting demands of competing accountabilities. Drawing on research projects conducted in the UK, *Educational Leadership* presents convincing evidence that the need to consider theory crosses national borders, and the authors discuss changes to professional identities and practices that researchers around the world will recognise. This detailed and insightful work will appeal to academics, researchers and postgraduate students in the fields of education and sociology, as well as those with an interest in organisational and political theory. The topical subject matter also makes the book of relevance to practitioners and policy-makers in education and the public services more generally.

Choice, Pathways and Transitions Post-16 Stephen Ball 2013-11-05 This internationally appealing book is based on a two-year case study of a group of young people as they move through their final year of mandatory schooling and into their first year of post-16 experience. It looks at their choices, the market behaviour of local education and training providers and those who help and advise these choices. The authors show that recent and current political policies for post-16 education disadvantage, marginalise and exclude young people rather than improve their life chances. The book draws together the major issues and attempts to suggest alternative ways forward for a more inclusive post-16 education and training system.

Software for Teaching Science Roger Frost 1998

Sharing Experience in Engineering Design (SEED 2002) M. A. C. Evatt 2002-10-22 *Sharing Experience in Engineering Design* is based on papers presented at the Engineering and Product Design Education Conference E & PDE 2002. This volume is vital reading for all those students, practitioners, and professionals operating in the field of product and engineering design and education. CONTENTS INCLUDE: The integration of design and business issues in the engineering curriculum What are the qualities and competencies required by product design employers? Product design courses lead the way in providing the graduate with the necessary skills to get the top job Designing for a sustainable future - promoting outreach through the use of case studies; Degree design - exploring creativity from the start Assessing creativity - theory and practice Developing an appreciation of the complex interactions between life-cycle analysis and design for manufacture Strategic design and product development - a practical application of business process re engineering in bespoke manufacturing Engineering design modules teaching by projects Product design project teaching, using athletic transport artefacts as the vehicle Sketching - a dying art? Overcoming human barriers to knowledge-based systems in design.

My Revision Notes OCR Computing for GCSE Computer Systems and Programming Sean O'Byrne 2013-09-06 *Unlock your full potential with this revision guide which focuses on the key content and skills you need to know. With My Revision Notes for OCR Computing for GCSE, which perfectly matches the theory units of the specification, you can: Take control of your revision: plan and focus on the areas you need to revise, with advice, summaries and notes from authors Sean O'Byrne and George Rouse Show you fully understand key topics, by using specific case studies to add depth to your knowledge of computing issues and processes Apply computing terms accurately with the help of definitions and key words on all topics Improve your skills to tackle specific exam questions with the help of self-testing and exam-style questions and answers Get exam-ready with last-minute quick quizzes at www.hodderplus.co.uk/myrevisionnotes*

Sociology in Perspective Mark Kirby 2000 This text, specifically for AQA specifications, is designed to be easy and encouraging for students to use. The book contains updated material and activities together with a new chapter on study skills. It also indicates clearly where activities meet the new evidence requirements for key skills.

The Cumulative Book Index 1995

Teaching Film at GCSE James Baker 2007-11-07 This book is for teachers of Media Studies and English who are responsible for delivering this exciting and demanding area of the curriculum. Suitable for both new and experienced teachers, it provides a range of approaches from the focused teaching of film in Media Studies to the use of film as support material in English courses. Clear explanations of the key concepts and ideas for film study are accompanied by a series of case studies, providing practical advice and exercises for every classroom environment. It includes: different approaches to using film in the classroom; an introduction to key concepts for studying film; an overview of influential critical and academic perspectives; a survey of historical and industrial contexts for production and consumption of film; and case studies of films within particular genres, Action films, Comic book adaptations and Teen movies. The guide is supported by extensive online resources to help the busy teacher get the most out of their students.

AQA Computer Science for GCSE Student Book Steve Cushing 2016-08-15 Exam Board: AQA Level: GCSE Subject: Computer Science First Teaching: September 2016 First Exam: Summer 2018 *Build student confidence and ensure successful progress through GCSE Computer Science. - Builds students' knowledge and confidence through detailed topic coverage and key points - Instils a deeper understanding and awareness of computer science, and its applications and implications in the wider world - Develops knowledge and computational thinking skills with tasks featured throughout the book - Ensures progression through GCSE with regular assessment questions, that can be developed with supporting Dynamic Learning digital resources*

Der lange Weg zur Freiheit Nelson Mandela 2014-01-25 »Ich bin einer von ungezählten Millionen, die durch Nelson Mandelas Leben inspiriert wurden.« Barack Obama Eine fast drei Jahrzehnte währende Gefängnishaft ließ Nelson Mandela zum Mythos der schwarzen Befreiungsbewegung werden. Kaum ein anderer Politiker unserer Zeit symbolisiert heute in solchem Maße die Friedenshoffnungen der Menschheit und den Gedanken der Aussöhnung aller Rassen wie der ehemalige südafrikanische Präsident und Friedensnobelpreisträger. Auch nach seinem Tod finden seine ungebrochene Charakterstärke und Menschenfreundlichkeit die Bewunderung aller friedenswilligen Menschen auf der Welt. Mandelas Lebensgeschichte ist über die politische Bedeutung hinaus ein spannend zu lesendes, kenntnis- und faktenreiches Dokument menschlicher Entwicklung unter Bedingungen und Fährnissen, vor denen die meisten Menschen innerlich wie äußerlich kapituliert haben dürften.

Practical experiments in school science lessons and science field trips Great Britain: Parliament: House of Commons: Science and Technology Committee 2011-09-14 This Science and Technology Committee report on practical experiments in school science lessons and science field trips concludes that many students are receiving poor practical science experiences during their secondary school education. There was no credible evidence to support the frequently cited explanation of health and safety concerns for a decline in practicals and trips. Instead, more focus is needed on what happens after teachers have been recruited to the profession: knowledge and practical skills must be maintained and developed in order for high quality science education to be delivered. High quality science facilities and qualified and experienced technical support are vital. A career structure for technical staff should be provided and the government should ensure schools provide science facilities to match its aspirations for science education. Practical science is relatively expensive and carries little cachet for parents comparing schools. The inspection regime and the requirements set for exam boards should therefore drive higher quality with more and better practical science lessons. The Committee also found a lack of coherence in the provision of science educational materials. It urges the science community to utilise the STEM directories - the online database of STEM enhancement and enrichment activities for schools and colleges - and calls on the government to secure the future of the directories which provide vital contacts between schools and scientists. Finally, the committee urges the government to provide a detailed strategy on how it intends to achieve its ambition to increase participation in school science subjects.

Teaching and Using ICT in Secondary Schools Terry Russell 2013-12-16 The coverage of this book will provide an ideal text for use during departmental meetings for all curriculum subjects where ICT is an issue. It can also be used as a reference text for school based mentors taking part in the teacher training process. As well as discussing the effective teaching of ICT as a curriculum subject, the author uses sample case studies to illustrate the wider role at Key Stages 3 and 4, for GCSE and for post-16 in the form of VCE. He also advises on the teacher training process; the primary/secondary transfer; issues related to interface design; hardware and software provision; and the assessment, recording and reporting of ICT capability. This book will appeal to a wide range of target readerships: trainees taking PGCE courses to become specialist ICT teachers as well as other PGCE trainees, as they all have to meet statutory ICT standards; practicing secondary teachers, whether specialists in ICT or other subjects, who need to use ICT in their teaching; and secondary mentors with ICT as a major part of their responsibility.

Using New Technologies to Enhance Teaching and Learning in History Terry Haydn 2013-02-11 Nearly all history teachers are interested in how new technology might be used to improve teaching and learning in history. However, not all history departments have had the time, expertise and guidance which would enable them to fully explore the wide range of ways in which ICT might help them to teach their subject more effectively. This much-needed collection offers practical guidance and examples of the ways in which new technology can enhance pupil engagement in the subject, impact on knowledge retention, get pupils learning outside the history classroom, and help them to work collaboratively using a range of Web 2.0 applications. The chapters, written by experienced practitioners and experts in the field of history education and ICT, explore topics such as: how to design web interactivities for your pupils what can you accomplish with a wiki how to get going in digital video editing what to do with the VLE? making best use of the interactive whiteboard designing effective pupil webquests digital storytelling in history making full use of major history websites using social media. *Using New Technologies to Enhance Teaching and Learning in History* is essential reading for all trainee, newly qualified and experienced teachers of history. It addresses many of the problems, barriers and dangers which new technology can pose, but it also clearly explains and exemplifies the wide range of ways in which ICT can be used to radically improve the quality of pupils' experience of learning history.

Midsummer Meltdown Cathy Hopkins 2008-05-01 Should you really keep every promise you make? Lia is thrilled when her parents organise a half-term holiday for not only her, but all her and Ollie's friends as well! But Squidge has a minor accident and can't make it. He insists that she go, of course, and in such a gorgeous setting Lia can't help but have a good time. But when she runs into an old flame, will she be able to be honest when she returns, no matter how painful? And will the

good-natured Squidge be able to control his frustration and feelings of jealousy? Will their relationship be able to survive or will it go into meltdown? The sixth book in the popular TRUTH, DARE, KISS, PROMISE series.

Edexcel Computer Science for GCSE Student Book George Rouse 2016-08-08 Exam Board: Edexcel Level: GCSE Subject: Computer Science First Teaching: September 2016 First Exam: Summer 2018 Build student confidence and ensure successful progress through GCSE Computer Science. Our expert author provides insight and guidance to meet the demands of the new Edexcel specification, with challenging tasks and activities to test the computational skills and knowledge required completing the exams and the non-examined assessment. - Builds students' knowledge and confidence through detailed topic coverage and explanation of key points to match important Edexcel concepts - Develops computational thinking skills with practice exercises and problem-solving tasks - Ensures progression through GCSE with regular assessment questions, that can be developed with supporting Dynamic Learning digital resources - Instils a deeper understanding and awareness of computer science, and its applications and implications in the wider world

Which School? 2010 Wendy Bosberry-Scott 2009-09-01 First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years.

Design and Make It! Tristram Shephard 2003-01-30 NOT AVAILABLE SEPARATELY

Lightning Strikes Richard Noble 2014-08-01 Philip Barnard is struck by lightning on his way home from the boatyard in 1910. He wakes up with memories of a day in 2010 when a tsunami causes devastation on the island of Java. How can he use his knowledge to save the lives of millions of people?

Quantitative Data Analysis in Education Paul Connolly 2007-08-07 This book provides a refreshing and user-friendly guide to quantitative data analysis in education for students and researchers. It assumes absolutely no prior knowledge of quantitative methods or statistics. Beginning with the very basics, it provides the reader with the knowledge and skills necessary to be able to undertake routine quantitative data analysis to a level expected of published research. Rather than focusing on teaching statistics through mathematical formulae, the book places an emphasis on using SPSS to gain a real feel for the data and an intuitive grasp of the main concepts and techniques involved. Drawing extensively upon up-to-date and relevant examples, the reader will be encouraged to think critically about quantitative research and its potential as well as its limitations in relation to education. Packed with helpful features, this book: provides illustrated step-by-step guides showing how to use SPSS, with plenty of exercises to encourage the reader to practice and consolidate their new skills makes extensive use of real-life educational datasets derived from national surveys in the US and UK to illustrate key points and to bring the material to life has a companion website that contains all of the educational datasets used in the book to download as well as comprehensive answers to exercises and a range of other useful resources that are regularly updated. The book will therefore appeal not only to undergraduate and postgraduate students but also to more established and seasoned educational researchers and lecturers and professors who have tended to avoid or shy away from quantitative methods.

Readings for Learning to Teach in the Secondary School Susan Capel 2013-01-11 Readings for Learning to Teach in the Secondary School brings together key articles to develop and support student teachers' understanding of the theory, research and evidence base that underpins effective practice. Designed for all students engaging with M Level study, each reading is contextualised and includes questions to encourage reflection and help you engage with material critically. Annotated further reading for every section supports your own research and writing. Readings are structured to make links with the practical guidance in the accompanying core textbook, Learning to Teach in the Secondary School. Topics covered include: motivation troublesome classroom behaviour ability grouping inclusive education personalised learning testing achievement and underachievement. Edited by the team that brings us Learning to Teach in the Secondary School, this Reader is an indispensable 'one-stop' resource that will support all students studying, researching and writing at M level on PGCE courses, as well as those on all other secondary education courses and masters degrees.
