

Global Insurtech Report 2017 Pricewaterhousecoopers

This is likewise one of the factors by obtaining the soft documents of this Global Insurtech Report 2017 Pricewaterhousecoopers by online. You might not require more become old to spend to go to the ebook creation as well as search for them. In some cases, you likewise get not discover the statement Global Insurtech Report 2017 Pricewaterhousecoopers that you are looking for. It will no question squander the time.

However below, subsequently you visit this web page, it will be consequently extremely simple to get as skillfully as download lead Global Insurtech Report 2017 Pricewaterhousecoopers

It will not acknowledge many grow old as we accustom before. You can accomplish it though sham something else at home and even in your workplace. thus easy! So, are you question? Just exercise just what we offer under as capably as evaluation Global Insurtech Report 2017 Pricewaterhousecoopers what you gone to read!

Handbook of Research on Strategic Fit and Design in Business Ecosystems Hacıoglu, Umit 2019-08-30
With advancing information technology, businesses must adapt to more efficient structures that utilize the latest in robotics and machine learning capabilities in order to create optimal human-robot cooperation. However, there are vital rising concerns regarding the possible consequences of deploying artificial intelligence, sophisticated robotic technologies, automated vehicles, self-managing supply modes, and blockchain economies on business performance and culture, including how to sustain a supportive business culture and to what extent a strategic fit between human-robot collaboration in a business ecosystem can be created. The Handbook of Research on Strategic Fit and Design in Business Ecosystems is a collection of innovative research that builds a futuristic view of evolving business ecosystems and a deeper understanding of business transformation processes in the new digital business era. Featuring research on topics such as cultural hybridization, Industry 4.0, and cybersecurity, this book is ideally designed for entrepreneurs, executives, managers, corporate strategists, economists, IT specialists, IT consultants, engineers, students, researchers, and academicians seeking to improve their understanding of future competitive business practices with the adoption of robotic and information technologies.

Private Health Insurance Sarah Thomson 2020-10 A collection of comparative case studies analysing the history, politics and performance of private health insurance globally and its implications for universal health coverage. This is essential reading for graduate students, scholars and policy makers working on health systems financing worldwide.

Global Trends of Modernization in Budgeting and Finance Ushakov, Denis 2018-11-30
Traditional financial markets are the most important lever of social and economic impact that can effectively regulate markets, industries, national economies, and international economic interactions, and form global and deeply integrated economic systems. Due to the global spread of financial instability and waves of financial crises, the problems of researching effective financial instruments to ensure national competitiveness becomes highly significant. Global Trends of Modernization in Budgeting and Finance is a pivotal reference source that provides vital research on the impacts of financial globalization in the context of economic digitalization and national financial markets. While highlighting topics such as entrepreneurship, international business, and socio-economic development, this publication explores modern conditions of rapid technological progress and financial market integration, as well as the methods of increasing regional intergovernmental organization efficiency. This book is ideally designed for policymakers, financial analysts, researchers, academicians, graduate-level students, business professionals, entrepreneurs, scholars, and managers seeking current research on new challenges and developments in national financial markets.

Evolving Perspectives on ICTs in Global Souths International Development Informatics Association. Conference 2020 This book constitutes the refereed proceedings of the 11th International Development

Informatics Association Conference, IDIA 2020, held in Macau, China, in March 2020.* The 14 revised full papers presented were carefully reviewed and selected from 43 submissions. The papers are organized in topical sections on ICT4D: taking stock; harnessing frontier technologies for sustainable development; ICT4D discourse, methodologies, and theoretical reflections; the evolving Global Souths. *The conference was held virtually due to the COVID-19 pandemic.

Drone Law and Policy Anthony A. Tarr 2021-08-12 Drone Law and Policy describes the drone industry and its evolution, describing the benefits and risks of its exponential growth. It outlines the current and proposed regulatory framework in Australia, the United States, the United Kingdom and Europe, taking into consideration the current and evolving technological and insurance landscape. This book makes recommendations as to additional regulatory and insurance initiatives which the authors believe are necessary to achieve an effective balance between the various competing interests. The 23 chapters are written by global specialists on crucial topics, such as terrorism and security, airport and aircraft safety, maritime deployment, cyber-risks, regulatory oversight, licensing, standards and insurance. This book will provide authoritative reference and expert guidance for regulators and government agencies, legal practitioners, insurance companies and brokers globally, as well as for major organisations utilising drones in industrial applications.

Agricultural Risk Transfer Roman Marco Hohl 2018-12-18 Gain a holistic view of agricultural (re)insurance and capital market risk transfer Increasing agricultural production and food security remain key challenges for mankind. In order to meet global food demand, the Food and Agriculture Organisation estimates that production has to increase by 50% by 2050 and requires large investments. Agricultural insurance and financial instruments have been an integral part to advancing productivity and are becoming more important in increasingly globalized and specialized agricultural supply chains in the wake of potentially more frequent and severe natural disasters in today's key producing markets. Underwriting, pricing and transferring agricultural risks is complex and requires a solid understanding of the production system, exposure, perils and the most suitable products, which vastly differ among developed and developing markets. In the last decade, new insurance schemes in emerging agricultural markets have greatly contributed to the large growth of the industry from a premium volume of US\$10.1 billion (2006) to US\$30.7 billion (2017). This growth is bound to continue as insurance penetration and exposure increase and new schemes are being developed. Agricultural (re)insurance has become a cornerstone of sovereign disaster risk financing frameworks. Agricultural Risk Transfer introduces the main concepts of agricultural (re)insurance and capital market risk transfer that are discussed through industry case studies. It also discusses best industry practices for all main insurance products for crop, livestock, aquaculture and forestry risks including risk assessment, underwriting, pricing, modelling and loss adjustment. Describes agricultural production risks and risk management approaches Covers risk transfer of production and financial risks through insurance and financial instruments Introduces modelling concepts for the main perils and key data sources that support risk transfer through indemnity- and index-based products Describes risk pricing and underwriting approaches for crop, livestock, aquaculture and forestry exposure in developed and developing agricultural systems Become familiar with risk transfer concepts to reinsurance and capital markets Get to know the current market landscape and main risk transfer products for individual producers, agribusinesses and governments through theory and comprehensive industry case studies Through Agricultural Risk Transfer, you'll gain a holistic view of agricultural (re)insurance and capital market solutions which will support better underwriting, more structured product development and improved risk transfer.

Success in the Bottom of the Pyramid Market in Africa Philipp von Carlowitz 2020-11-13 This book presents an empirical investigation of the efforts that multinational pharmaceutical companies take in order to find a business model that allows for a profitable access to the Bottom of the Pyramid (BoP) markets. The Bottom of the Pyramid in Africa is frequently mentioned as an attractive market due to its sheer size. Yet most companies struggle to access it because of the low price level, difficult physical market access and challenges when it comes to payment. More specifically, the book investigates the following business model-related questions: Do pharmaceutical companies provide products that meet the needs of the BoP? What characterizes the value generation of the company? What revenue model leads to a profitable business, and what role does a network of partners play in the business model? Findings reveal that there is no 'one-size-fits-all' answer to these questions. Providing continuous availability, affordability at a good quality of goods and services, creating health awareness, as well as localizing business to achieve a level of inclusiveness are essential prerequisites for success. In the last

chapter this book provides a business model prototype that accounts for these key success factors for business at the Bottom of the Pyramid and points to further research topics.

Enhancing the Role of Insurance in Cyber Risk Management OECD 2017-12-08 This report provides an overview of the financial impact of cyber incidents, the coverage of cyber risk available in the insurance market, the challenges to market development and initiatives to address those challenges.

ERM and QRM in Life Insurance Ermanno Pitacco 2020-08-25 This book deals with Enterprise Risk Management (ERM) and, in particular, Quantitative Risk Management (QRM) in life insurance business. Constituting a “bridge” between traditional actuarial mathematics and insurance risk management processes, its purpose is to provide advanced undergraduate and graduate students in the Actuarial Sciences, Finance and Economics with the basics of ERM (in general) and QRM applied to life insurance business. The main topics dealt with are: general issues on ERM, risk management tools for life insurance and life annuities, deterministic and stochastic analysis of the behaviour of a portfolio fund, application of sensitivity testing to assess ranges of results of interest, stress testing to assess the impact of extreme scenarios, and the product development process for life annuity products.

World review of capture fisheries and aquaculture insurance 2022 Van Anrooy, R., Espinoza Córdova, F., Japp, D., Valderrama, D., Gopal Karmakar, K., Lengyel, P., Parappurathu, S., Upare, S., Tietze, U., Costelloe, T., Zhang, Z. 2022-04-15 This world review of capture fisheries and aquaculture insurance presents the findings of five regional and four national reports conducted in 2020. An estimated 450 000 fishing vessels worldwide are covered by marine hull insurance. Nearly all of the estimated 67 800 large-scale industrial fishing vessels are covered by marine hull insurance, as well as 50–60 percent of the estimated 430 000 semi-industrial fishing vessels. However, over 95 percent of the 2.3 million motorized small-scale fishing vessels operate uninsured. Most small-scale fishers do not have access to adequate insurance services. Between 2009 and 2019, underwriting experiences in fishing vessel insurance were generally reported as “Good”. What is more, access to accident, life and health insurance services for crew on fishing vessels and small-scale fishers in developing countries has improved in recent years. In 2020, the number of aquaculture insurance policies in force was estimated at over 40 000 worldwide, with China and Indonesia the largest markets for this type of insurance. While large-scale aquaculture producers are well served by the insurance industry, the provision of insurance is inadequate for medium and small-scale farmers, particularly in Asia. Underwriting experiences for aquaculture stock mortality insurance were reported as “Good” to “Very good” (40 percent), or “Neutral” (36 percent). The insurance industry has consolidated the market and increased profitability in aquaculture insurance. This world review contains information on the capture fisheries and aquaculture insurance market, the prevailing underwriting practices, perils covered, policies in force, risk management and claim handling procedures. Finally, it offers a series of recommendations for increasing insurance service provision to the fisheries and aquaculture industries.

Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2019-02-01 The rapid evolution of technology continuously changes the way people interact, work, and learn. By examining these advances from a sociological perspective, researchers can further understand the impact of cyberspace on human behavior, interaction, and cognition. Multigenerational Online Behavior and Media Use: Concepts, Methodologies, Tools, and Applications is a vital reference source covering the impact of social networking platforms on a variety of relationships, including those between individuals, governments, citizens, businesses, and consumers. The publication also highlights the negative behavioral, physical, and mental effects of increased online usage and screen time such as mental health issues, internet addiction, and body image. Showcasing a range of topics including online dating, smartphone dependency, and cyberbullying, this multi-volume book is ideally designed for sociologists, psychologists, computer scientists, engineers, communication specialists, academicians, researchers, and graduate-level students seeking current research on media usage and its behavioral effects.

Optimizing Growth Jason Green 2018-04-16 Leverage big data and demand into sustainable profitable growth Optimizing Growth is a handbook for how to succeed in the age of big data. Today’s business environment looks dramatically different than it did even a decade ago, and it continues to evolve at an increasing rate; macroeconomic shifts, consumer trends, technological advances, and changing competitive dynamics are accelerating the pace of change, and businesses are struggling to grow amidst the turbulence. This book provides insightful guidance, real-world success stories and practical tools to achieve growth in this new era, utilizing big data to achieve a deeper understanding of demand,

customers, competitors, and opportunity. With disruption around every corner, growth now demands innovative new approaches and an improved capacity to meet customer needs; by gaining a stronger grasp of demand, businesses can elevate performance from “survive” to “thrive.” This book provides the approaches, analytics, frameworks, and organizational capabilities required to gain competitive advantage, and describes the new mindset required to leverage these tools into sustainable growth. Develop a deeper understanding of your business’s growth factors Re-sync your thinking to gain greater leverage against disruption Delve deeper into demand, and boost fulfillment capabilities Capture more growth opportunities using precision analytics frameworks The one thing that will never change about business is the goal of growth—but the paths to growth change continuously. New opportunities forge new routes to the top, while others become obsolete—does your company know the difference? The ability to differentiate between fads and genuine evolution is more critical than ever before. Optimizing Growth provides deep knowledge of what’s out there, and a clear framework for forging ahead.

Insurance Transformed Michael Naylor 2017-10-16 This book explores how a range of innovative disruptive technologies is about to combine to transform the insurance industry, the products it produces, and the way the industry is managed. It argues that unless current insurance providers react to these waves of disruption they will be swept away by new innovators. The book describes what insurers need to do to survive. The main aim is to get insurers to reimagine their industry away from the sale of a one-off product, into the sale of a series of real-time, data-based risk services. While parts of these disruptions have been discussed, this book is the first to bring all the issues together and unites them using a theoretical framework. This book is essential reading for insurance industry participants as well as to academics interested in insurance and understanding the key issues the industry currently faces.

Die Digitalisierung und die Digitale Transformation der Finanzwirtschaft Tim Alexander Herberger 2019-12-15 Die Finanzwirtschaft steht im Kontext der Digitalisierung und Digitalen Transformation der Ökonomie als eine der Branchen im Mittelpunkt der Aufmerksamkeit, wo die damit verbundenen Marktveränderungen von verschiedenen Interessensgruppen erlebt werden können. Die Veränderungen in finanzwirtschaftlichen Geschäftsprozessen, nicht zuletzt durch technologie-basierte Startups (sog. FinTechs) forciert, sind nicht nur innerhalb der Branche, sondern auch beim Endkunden durch konkrete digitale Innovationen spürbar. Dieser Sammelband widmet sich einigen der im Zusammenhang der Digitalisierung und Digitalen Transformation der Finanzwirtschaft entstandenen Geschäftsmodelle und betrachtet diese vor dem Hintergrund der Frage, ob die Finanzwirtschaft sich "nur" in ein moderneres Kleid hüllt oder ob es sich um tiefgreifende Marktstrukturveränderungen bis hin zu einer möglichen Disintermediation innerhalb der Finanzintermediationsbranche handelt.

Conceptualizing the Regulatory Thicket Shen Wei 2020-10-19 This book examines the regulatory framework, regulatory objectives, regulatory logics, regulatory instruments, regulatory failures, and regulatory responses in China’s financial market after the global financial crisis. The book provides an in-depth analysis of China’s contemporary financial regulatory system, focusing on risks, regulation, and policies in practice. By drawing on public and private interest theories relating to financial regulation, the book contends that the controlled development of the banking sector, and the financial sector generally, has transformed China’s banks into more market-oriented institutions and increased public sector growth. However, China’s financial market and financial regulation have some inherent weaknesses and deficiencies. This book also offers insights into how this can be improved or adapted to minimize systemic risks in China’s financial sector. This book tries to prove that financial regulation is not just a vehicle for maintaining efficient financial markets but a primary tool through which the Chinese government achieves its political and economic objectives. More fundamentally, according to the law and finance theory, strong market and vibrant judicial systems are needed to further modernize China’s financial markets and market economy. The book will be a useful reference for anyone interested in learning from the Chinese experience.

Fraud and Corruption Peter C. Kratcoski 2018-09-14 This textbook provides an overview of the major types of fraud and corrupt activities found in private and public agencies, as well as the various methods used to prevent fraud and corruption. It explores where opportunities for fraud exist, the personal characteristics of those who engage in fraud, as well as their prevention and control. This work covers fraud in the financial sector, insurance, health care, and police organizations, as well as cybercrime. It covers the relationship between fraud, corruption, and terrorism; criminal networks; and major types of personal scams (like identity theft and phishing). Finally, it covers the prevention and control of fraud, through corporate whistle blowing, investigative reporting, forensic accounting, and educating the public.

This work will be of interest to graduate-level students (as well as upper-level undergraduates) in Criminology & Criminal Justice, particularly with a focus on white collar and corporate crime, as well as related fields like business and management.

***The Technological Revolution in Financial Services** Michael R. King 2020-08-20 Industry specialists and thought leaders explain how financial services will evolve in the coming decade in response to heightened regulation, technological disruption, and changing demographics.*

***FinTech, BigTech and Banks** Alessandra Tanda 2019-07-30 This Palgrave Pivot analyses the evolution of strategies and business models adopted by financial operators that employ technological solutions to deliver financial products and services. The analysis is performed on a proprietary dataset built on different sources that highlight important differences in strategical approaches taken by FinTech companies, TechFin and BigTech, and banks (traditional and digital native). For each type, the authors underline their distinctive patterns, strengths and weaknesses. The main focus of the analysis is on the European market that is investigated also in the light of the difference and similarities with other markets (such as US and China). The unbundling and re-bundling of productive processes in finance, the treatment of information and the level of innovation in the customer relationship highlight the intense change that the banking activities of new financial services providers are currently dealing with, especially the retail segment. Despite the main international banks' implementation of innovative strategical approaches to take advantage of the digitalization of business and cope with competition, so far the level of the disruption brought by FinTech is not fully understood or widespread. This holds especially true for the smaller banks: the latter need to take a proactive approach to individuate a business model able to satisfy the new customer needs and the competitive pressure that are destined to increase and further evolve. This book addresses this and would appeal to academics, researchers and students of banking, FinTech and financial innovation alongside policy makers, regulatory authorities, FinTechs and banks.*

***European Financial Regulation** Veerle Colaert 2019-12-26 Mirroring the long-established structure of the financial industry, EU financial regulation as we know it today approaches banking, insurance and investment services separately and often divergently. In recent decades however, the clear separation between financial sectors has gradually evaporated, as business lines have converged across sectors and FinTech solutions have emerged which do not fit traditional sector boundaries. As the contours of the traditional tripartition in the financial industry have faded, the diverging regulatory and supervisory treatment of these sectors has become increasingly at odds with economic reality. This book brings together insights developed by distinguished researchers and industry professionals in a series of articles analysing the main areas of EU financial regulation from a cross-sectoral perspective. For each specific research theme – including prudential regulation, corporate governance and conduct of business rules – the similarities, as well as gaps, overlaps and unjustifiable differences between banking, securities and insurance regulation, are clearly presented and discussed. This innovative research approach is aimed at informing lawmakers and policymakers on potential improvements to EU financial regulation whilst also supporting legal and compliance professionals applying the current framework or looking to streamline compliance processes.*

***Insurance & Innovation 2018** Andreas Eckstein 2018-03-20 Die Versicherungsbranche steht vor immensen Herausforderungen: Mit der fortschreitenden Digitalisierung, der zunehmenden Regulierung und den anhaltend niedrigen Zinsen tun sich die Versicherungsunternehmen zum großen Teil immer noch schwer. Innovationen werden oft nicht als Chancen begriffen, sondern als Angriff auf Bestehendes. Und schon befinden sich viele Unternehmen der Versicherungswirtschaft mitten in einem bisher unbekanntem Wettlauf mit Startups und InsurTechs. Aber den Wettlauf kann nur der gewinnen, der es gleichzeitig schafft, Kunden, Partner und Mitarbeiter aktiv mit in die Digitale Transformation einzubinden. Bei allen (digitalen) Herausforderungen, die in den kommenden Jahren auf die Versicherungsbranche zukommen, geht es darum, den Menschen in den Mittelpunkt zu stellen. Nur so lässt sich das Vertrauen der Kunden und Mitarbeiter erneuern und erhalten. In diesem dynamischen und überaus spannenden Veränderungskosmos bietet dieses Buch genau im rechten Moment eine aussagekräftige Auswahl an Praxisbeispielen verschiedenster Versicherungen. Die Beispiele stammen aus dem gesamten deutschsprachigen Raum - also aus allen DACH-Ländern. Sie zeigen detailliert und nachvollziehbar auf, wie mit Innovationen den Herausforderungen der Zukunft begegnet werden kann. Das Buch möchte inspirieren und dazu ermutigen, neue Wege zu gehen. Vor allem Führungskräfte und Entscheider in Versicherungen, die kreativ und strategisch handeln, erhalten hier die perfekten Blaupausen für die*

eigenen Innovationsprojekte, praktische Anregungen und methodische Tipps.

Smart Computing Applications in Crowdfunding Bo Xing 2018-12-07 The book focuses on smart computing for crowdfunding usage, looking at the crowdfunding landscape, e.g., reward-, donation-, equity-, P2P-based and the crowdfunding ecosystem, e.g., regulator, asker, backer, investor, and operator. The increased complexity of fund raising scenario, driven by the broad economic environment as well as the need for using alternative funding sources, has sparked research in smart computing techniques. Covering a wide range of detailed topics, the authors of this book offer an outstanding overview of the current state of the art; providing deep insights into smart computing methods, tools, and their applications in crowdfunding; exploring the importance of smart analysis, prediction, and decision-making within the fintech industry. This book is intended to be an authoritative and valuable resource for professional practitioners and researchers alike, as well as finance engineering, and computer science students who are interested in crowdfunding and other emerging fintech topics.

Transformation Dynamics In Fintech: An Open Innovation Ecosystem Outlook Anne-laure Mention 2021-10-13 Technology-driven innovation in financial services has been attracting global attention and interest. FinTech innovation is presenting a paradigm shift in financial services affecting a wide range of products, processes and services but also sparking a broader evolutionary transformation, growth opportunities and foundational systemic and structural changes in light of technological interdependencies among market players, infrastructures and ecosystem stakeholders. Transformation Dynamics in FinTech contributes to the intellectual curiosity around the symbiotic relationship of finance and technology by focusing on the multidimensional and multidisciplinary role of open innovation within FinTech innovation, observing and communicating the latest technological, managerial, governance, policy and regulatory perspectives, trends and developments. This book is an essential reading for anyone interested in the growing and evolving development of FinTech ecosystems based on new capabilities and structures that create new dominant architectural designs, which determine competitive dynamics, products, services, processes, business models, markets, value chains, within an open and transformed financial services industry landscape.

Databases Theory and Applications Junhu Wang 2018-05-17 This book constitutes the refereed proceedings of the 29th Australasian Database Conference, ADC 2018, held in Gold Coast, QLD, Australia, in May 2018. The 23 full papers plus 6 short papers presented together with 3 demo papers were carefully reviewed and selected from 53 submissions. The Australasian Database Conference is an annual international forum for sharing the latest research advancements and novel applications of database systems, data-driven applications, and data analytics between researchers and practitioners from around the globe, particularly Australia and New Zealand.

Insurance 4.0 Bernardo Nicoletti 2020-10-31 Industry 4.0 has spread globally since its inception in 2011, now encompassing many sectors, including its diffusion in the field of financial services. By combining information technology and automation, it is now canvassing the insurance sector, which is in dire need of digital transformation. This book presents a business model of Insurance 4.0 by detailing its implementation in processes, platforms, persons, and partnerships of the insurance companies alongside looking at future developments. Filled with business cases in insurance companies and financial services, this book will be of interest to those academics and researchers of insurance, financial technology, and digital transformation, alongside executives and managers of insurance companies.

Handbook of Research on Information and Cyber Security in the Fourth Industrial Revolution Fields, Ziska 2018-06-22 The prominence and growing dependency on information communication technologies in nearly every aspect of life has opened the door to threats in cyberspace. Criminal elements inside and outside organizations gain access to information that can cause financial and reputational damage. Criminals also target individuals daily with personal devices like smartphones and home security systems who are often unaware of the dangers and the privacy threats around them. The Handbook of Research on Information and Cyber Security in the Fourth Industrial Revolution is a critical scholarly resource that creates awareness of the severity of cyber information threats on personal, business, governmental, and societal levels. The book explores topics such as social engineering in information security, threats to cloud computing, and cybersecurity resilience during the time of the Fourth Industrial Revolution. As a source that builds on available literature and expertise in the field of information technology and security, this publication proves useful for academicians, educationalists, policy makers, government officials, students, researchers, and business leaders and managers.

Offshore Financial Centres and the Law Dominic Thomas-James 2021-07-16 This book considers the

ability of island jurisdictions with financial centres to meet the expectations of the international community in addressing the threats posed to themselves and others by their innocent (or otherwise) facilitation of the receipt of suspect wealth. In the global financial architecture, British Overseas Territories are of material significance. Through their inalienable right to self-determination, many developed offshore financial centres to achieve sustainable economic development. Focusing on Bermuda, Turks and Caicos, and Anguilla, the book concerns suspect wealth emanating from financial crimes including corruption, money laundering and tax evasion, as well as controversial conduct like tax avoidance. This work considers the viability of international standards on suspect wealth in the context of the territories, how willing or able they are to comply with them, and how their financial centres can better prevent receipt of suspect wealth. While universalism is desirable in the modern approach to tackling suspect wealth, a one-size-fits-all approach is inappropriate for these jurisdictions. On critically evaluating their legislative and regulatory regimes, the book advances that they demonstrate willingness to comply with international standards. However, their abilities and levels of compliance vary. In acknowledging the facilitatively harmful role the territories can play, this work draws upon evidence of implication in transnational financial crime cases. Notwithstanding this, the book questions whether the degree of criticism that these offshore jurisdictions have encountered is warranted in light of apparent willingness to engage in the enactment and administration of internationally accepted laws and cooperate with international institutions.

Innovative Strategies for Implementing FinTech in Banking Albastaki, Yousif Abdullatif 2020-08-28
FinTech is encouraging various new practices, such as diminishing the use of cash in different countries, increasing rate of mobile payments, and introducing new algorithms for high-frequency trading across national boundaries. It is paving the way for new technologies emerging in the information technology scene that allow financial service firms to automate existing business processes and offer new products, including crowdfunding or peer-to-peer insurance. These new products cater to hybrid client interaction and customer self-services, changing the ecosystem by increasing outsourcing for focused specialization by resizing and leading to new ecosystems and new regulations for encouraging FinTech. However, such new ecosystems are also accompanied by new challenges. Innovative Strategies for Implementing FinTech in Banking provides emerging research exploring the theoretical and practical aspects of technology inclusion in the financial sector and applications within global financing. It provides a clear direction for the effective implementation of FinTech initiatives/programs for improving banking financial processes, financial organizational learning, and performance excellence. Featuring coverage on a broad range of topics such as artificial intelligence, social financing, and customer satisfaction, this book encourages the management of the financial industry to take a proactive attitude toward FinTech, resulting in a better decision-making capability that will support financial organizations in their journey towards becoming FinTech-based organizations. As such, this book is ideally designed for financial analysts, finance managers, finance administrators, banking professionals, IT consultants, researchers, academics, students, and practitio

Mergers & Acquisitions Review Mark Zerdin 2017-10-31 *The Mergers & Acquisitions Review, edited by Mark Zerdin of Slaughter and May, seeks to provide a richer understanding of the shape of M&A in the global markets, together with the challenges and opportunities facing market participants. This comes at a time when the international market has seen a boom in dealmaking, with many markets reaching post-crisis peaks and some recording all-time highs. Mega-deals have been at the heart of the expanding market, with companies tapping into cash piles and cheap debt to fund transformational deals. Looking behind the headline figures, however, a number of factors suggest dealmaking may not continue to grow as rapidly as it has done recently. This book examines this topic and more across over 55 jurisdictions, as well as providing more general interest chapters covering the European Union, European Private Equity, M&A Litigation, and Offshore Private Equity. Contributors include: Didier Marti, Bredin Prat; Heinrich Knepper, Hengeler Mueller; Javier Ruiz-Camara Bayo, Uria Menendez.*

Fintech in Islamic Finance Umar A. Oseni 2019-06-26 *Featuring high-level analysis of Islamic law, this book examines fintech in Islamic finance from both theoretical and empirical perspectives. Whilst building on existing approaches, it also discusses the current application of fintech in promoting financial inclusion through innovative solutions in Muslim-majority countries, identifying future directions for policy-makers. With original chapters written by prominent academics, senior lawyers and practitioners in the global Islamic finance industry, this book serves as the first standalone pioneering reference work on fintech in Islamic finance. It also, for the first time, examines the position of Islamic law*

on cryptocurrencies, such as bitcoin. Besides the conceptual analysis of the Shariah and legal aspects of fintech in Islamic finance, this book provides relevant case studies showing current and potential developments in the application of fintech in various sectors ranging from crowdfunding and smart contracts, to Online Dispute Resolution, Investment Account Platform and identity verification in the KYC process. Setting the agenda for researchers in the field, Fintech in Islamic Finance will be useful to students and scholars of Islamic finance and financial technology.

Economic Outlook for Southeast Asia, China and India 2019 Towards Smart Urban Transportation OECD 2018-12-20 The Economic Outlook for Southeast Asia, China and India is a bi-annual publication on regional economic growth, development and regional integration in Emerging Asia. It focuses on the economic conditions of Association of Southeast Asian Nations (ASEAN) member countries: Brunei Darussalam ...

Global Innovation Index 2017 Cornell University ; INSEAD ; World Intellectual Property Organization 2017-06-15 The Global Innovation Index provides detailed metrics about the innovation performance of 127 countries and economies around the world. Its 81 indicators explore a broad vision of innovation, including political environment, education, infrastructure and business sophistication. This year's report reviews the state of innovation in agriculture and food systems across sectors and geographies. Chapters of the report provide more details on this year's theme from academic, business, and particular country perspectives from leading experts and decision makers.

The Development of the Maltese Insurance Industry Mark Laurence Zammit 2018-09-07 Drawing upon empirical findings, archival research, and interviews, Zammit, Spiteri, and Grima fill a major gap in the literature by delivering a study of the development of the Maltese insurance industry.

Challenges in Cybersecurity and Privacy - the European Research Landscape Jorge Bernal Bernabe 2022-09-01 Cybersecurity and Privacy issues are becoming an important barrier for a trusted and dependable global digital society development. Cyber-criminals are continuously shifting their cyber-attacks specially against cyber-physical systems and IoT, since they present additional vulnerabilities due to their constrained capabilities, their unattended nature and the usage of potential untrustworthiness components. Likewise, identity-theft, fraud, personal data leakages, and other related cyber-crimes are continuously evolving, causing important damages and privacy problems for European citizens in both virtual and physical scenarios. In this context, new holistic approaches, methodologies, techniques and tools are needed to cope with those issues, and mitigate cyberattacks, by employing novel cyber-situational awareness frameworks, risk analysis and modeling, threat intelligent systems, cyber-threat information sharing methods, advanced big-data analysis techniques as well as exploiting the benefits from latest technologies such as SDN/NFV and Cloud systems. In addition, novel privacy-preserving techniques, and crypto-privacy mechanisms, identity and eID management systems, trust services, and recommendations are needed to protect citizens' privacy while keeping usability levels. The European Commission is addressing the challenge through different means, including the Horizon 2020 Research and Innovation program, thereby financing innovative projects that can cope with the increasing cyberthreat landscape. This book introduces several cybersecurity and privacy research challenges and how they are being addressed in the scope of 15 European research projects. Each chapter is dedicated to a different funded European Research project, which aims to cope with digital security and privacy aspects, risks, threats and cybersecurity issues from a different perspective. Each chapter includes the project's overviews and objectives, the particular challenges they are covering, research achievements on security and privacy, as well as the techniques, outcomes, and evaluations accomplished in the scope of the EU project. The book is the result of a collaborative effort among relative ongoing European Research projects in the field of privacy and security as well as related cybersecurity fields, and it is intended to explain how these projects meet the main cybersecurity and privacy challenges faced in Europe. Namely, the EU projects analyzed in the book are: ANASTACIA, SAINT, YAKSHA, FORTIKA, CYBECO, SISSDEN, CIPSEC, CS-AWARE. RED-Alert, Truessec.eu. ARIES, LIGHTest, CREDENTIAL, FutureTrust, LEPS. Challenges in Cybersecurity and Privacy - the European Research Landscape is ideal for personnel in computer/communication industries as well as academic staff and master/research students in computer science and communications networks interested in learning about cyber-security and privacy aspects.

The Future of Finance Henri Arslanian 2019-07-15 This book, written jointly by an engineer and artificial intelligence expert along with a lawyer and banker, is a glimpse on what the future of the financial services will look like and the impact it will have on society. The first half of the book provides a detailed

yet easy to understand educational and technical overview of FinTech, artificial intelligence and cryptocurrencies including the existing industry pain points and the new technological enablers. The second half provides a practical, concise and engaging overview of their latest trends and their impact on the future of the financial services industry including numerous use cases and practical examples. The book is a must read for any professional currently working in finance, any student studying the topic or anyone curious on how the future of finance will look like.

Cyber Law, Privacy, and Security: Concepts, Methodologies, Tools, and Applications Management Association, Information Resources 2019-06-07 The internet is established in most households worldwide and used for entertainment purposes, shopping, social networking, business activities, banking, telemedicine, and more. As more individuals and businesses use this essential tool to connect with each other and consumers, more private data is exposed to criminals ready to exploit it for their gain. Thus, it is essential to continue discussions involving policies that regulate and monitor these activities, and anticipate new laws that should be implemented in order to protect users. Cyber Law, Privacy, and Security: Concepts, Methodologies, Tools, and Applications examines current internet and data protection laws and their impact on user experience and cybercrime, and explores the need for further policies that protect user identities, data, and privacy. It also offers the latest methodologies and applications in the areas of digital security and threats. Highlighting a range of topics such as online privacy and security, hacking, and online threat protection, this multi-volume book is ideally designed for IT specialists, administrators, policymakers, researchers, academicians, and upper-level students.

Onlearning: How disruptive education reinvents learning José Cláudio Securato 2020-06-23 Onlearning - How disruptive education reinvents learning brings a new concept, which appears as a response to the desire for change in education, specifically in education for executives, in the face of the exponential and out-of-sync transformations of society, which happen through technology and revolutionize organizations, people's lives and customs; with the aim of extracting the best from this evolution and expanding it in a maximized way into executive learning. The work consists of three parts: Part I deals with the history of work-oriented education, executive education, and business schools. It shows how the teaching of Administration was formalized, mainly by business schools, and what learning and cognition methodologies were developed by the various thinkers of the 19th and 20th centuries, whose models have repercussions until today. Part II outlines the scenario in which technology and digital transformation are consolidated as fundamental means for creating disruption in the most diverse areas of knowledge and industry sectors. It approaches how Clayton Christensen's theory of disruptive strategy defies the logic of traditional innovation, as well as what are the effects of new technologies on the economy, society and people's lives, and how fast are they advancing to become accessible, radically transforming reality. Finally, Part III deals with education and Saint Paul's disruptive proposal for executive education, Onlearning. It reflects on the need for education to concretely impact technological evolution in a broad way, in its economic and social aspect. It ends by presenting 20 conclusions on Onlearning, featuring objectives, actions, and projections for the future of education, based on the proposal to reinvent education through the resources that technology and digital transformation make available to everyone.

International Corporate Reporting Pauline Weetman 2020-03-24 This textbook provides a comprehensive overview of international corporate reporting which enhances students' understanding of diversity and convergence in the field. The authors discuss the institutional and cultural context in which international corporate reporting has developed over the years as well as the global reach of IFRS Standards from the IASB throughout and beyond the European Union, into interest groups and emerging economies. Other key elements explored throughout the book include assurance through auditing and corporate governance, narrative reporting, strategic and corporate social responsibility, group accounting, current accounting issues and taxation in corporate reports. Indicative research examples show how the methods used in research papers may be understood and applied. Case studies outline short projects based on corporate cases, with related links to material on corporate websites. Helpful and reliable sources of information and data are identified through hyperlinks to accessible websites. End-of-chapter questions encourage discussion of the main issues. Throughout there is a focus on accountability and the information needs of stakeholders. This new edition of a classic text is fully revised and updated in order to remain essential reading for students of international accounting and corporate reporting globally. The book will be an invaluable resource for postgraduate taught programmes and final-year undergraduate courses in accounting, finance and business studies.

***Fintech in a Flash* Agustin Rubini 2018-12-17** The financial services technology industry is booming and promises to change the way we manage our money online, disrupting the current landscape of the industry. Understanding fintech's many facets is the key to navigating the complex nuances of this global industry. *Fintech in a Flash* is a comprehensive guide to the future of banking and insurance. It discusses an array of hot topics such as online payments, crowdfunding, challenger banks, online insurance, digital lending, big data, and digital commerce. The author provides easy to understand explanations of the 14 main areas of fintech and their future, and insight into the main fintech hubs in the world and the so-called unicorns, fintech firms that have made it past a \$1 billion valuation. He breaks down the key concepts of fintech in a way that will help you understand every aspect so that you can take advantage of new technologies. This detailed guide is your go-to source for everything you need to confidently navigate the ever-changing scene of this booming industry.

***Insurance Coverage Litigation* Eugene R. Anderson 1999-01-01** The absence of persuasive precedents may prevent some attorneys from framing the effective policyholder arguments in insurance coverage litigation. With *Insurance Coverage Litigation, Second Edition*, you'll discover how the experts analyze the facts to win your next insurance coverage case. This unique resource provides comprehensive examination of the full range of issues shaping insurance coverage cases being heard in the courts today—and—including the publicly available, but hard-to-find industry and "lore" that savvy insurance practitioners use to win complex insurance coverage cases. Whichever side you represent in the billion dollar insurance coverage field, this work contains vital information you can't afford to be without when preparing a case for state or federal court. *Insurance Coverage Litigation* supplies: Extensive analyses of case law on insurance coverage issues arising under general liability insurance policies. Sample CGL Policy Forms. The most in-depth discussion of the drafting history of standard-form general liability insurance policy language—and—including language derived from the insurance industry's own representations to the public, governmental agencies, courts and policyholders—and—one of the most powerful tools available to policyholders. Easy-reference tables and state-by-state summaries that help you quickly grasp and compare court interpretations on a broad range of issues including the reasonable expectation doctrine, trigger of coverage and allocation, notice of claim or action, and insurability of punitive damages. Cutting edge analysis and guidance on rapidly evolving areas such as environmental liability, intellectual property disputes, and "cyber" losses and liability, terrorism coverage, and more.

***Blockchain, Fintech, and Islamic Finance* Hazik Mohamed 2022-09-05** Following the success of the first edition that brought attention to the digital revolution in Islamic financial services, comes this revised and updated second edition of *Blockchain, Fintech and Islamic Finance*. The authors reiterate the potential of digital disruption to shrink the role and relevance of today's banks, while simultaneously creating better, faster, cheaper services that will be an essential part of everyday life. Digital transformation will also offer the ability to create new ways to better comply to Islamic values in order to rebuild trust and confidence in the current financial system. In this new edition, they explore current concepts of decentralized finance (DeFi), distributed intelligence, stablecoins, and the integration of AI, blockchain, data analytics and IoT devices for a holistic solution to ensure technology adoption in a prudent and sustainable manner. The book discusses crucial innovation, structural and institutional developments for financial technologies including two fast-growing trends that merge and complement each other: tokenization, where all illiquid assets in the world, from private equity to real estate and luxury goods, become liquid and can be traded more efficiently, and second, the rise of a new tokenized economy where inevitably new rules and ways to enforce them will develop to fully unleash their capabilities. These complementary and oft-correlated trends will complete the decentralization of finance and will influence the way future financial services will be implemented. This book provides insights into the shift in processes, as well as the challenges that need to be overcome for practical applications for AI and blockchain and how to approach such innovations. It also covers new technological risks that are the consequence of utilizing frontier technologies such as AI, blockchain and IoT. Industry leaders, Islamic finance professionals, along with students and academics in the fields of Islamic finance and economics will benefit immensely from this book.
