Local Politics in a Comparative Perspective Elena Chernenkova 2017-10-16 Selbstverwaltung ist eines der zentralen Prinzipien politischer Organisation von Kommunen in Europa. Und Kommunen sind für Bürgerinnen und Bürger die Orte direkt erfahrbare Politik. Gleichzeitig sind sie in größere soziale und politische Kontexte eingebettet, die politische Prozesse und Strukturen auf der lokalen Ebene beeinflussen und formen. Bei der Analyse lokaler Politik bietet es sich daher an, regionale Kultur, institutionelle Arrangements und Multilevel-Governance als mögliche Determinanten in die Analyse einzubeziehen, um Variationen der Umsetzung des Prinzips der Selbstverwaltung zu verstehen. Am Beispiel zweier Städte – Petrozavodsk und Tübingen – beleuchten die Beiträge von WissenschaftlerInnen und PraktikerInnen aus Verwaltung, Politik und Zivilgesellschaft aus einer vergleichenden Perspektive, wie lokale Politik und politische Kultur in Kontexten der Multilevel-Governance ausgestaltet sind und wie Partizipation und zivilgesellschaftliches Engagement in unterschiedlichen systemischen Kontexten funktionieren. Mit Beiträgen von: Daniel Buhr, Elena Chernenkova, Rolf Frankenberger, Martin Großhüttmann, Marina Gvozdeva, Aleksandr Ilin, Varvara Inozemtseva, Stephan Klingebiel, Ilona Kosheleva, Inna Kreneva, Natalya Lavrushina, Anastasia Lesik, Nikolay Oskin, Yuliya Petrovskaya, Maria Pitukhina, Svetlana Rozhneva, Konstantin Terentyev, Oleg Tolstoguzov, Elena Tsumarova, Dmitry Tsvibel, Gertrud van Ackern, Olga Veselovskaya und Gleb Yarovoy.

The SAGES Manual of Hernia Surgery S. Scott Davis, Jr. 2018-11-23 This edition of the SAGES Manual of Hernia Surgery aligns with the current version of the new SAGES University MASTERS Program Hernia Surgery pathway. This manual serves as a curriculum for participants in the MASTERS Program as well as a modern text on hernia surgery for all learners. Hernia surgery is one of the fastest developing fields in general surgery today. There have been rapid advancements in hernia techniques in recent years, making most prior texts on the subject obsolete. These advancements involve significant evolution in both the techniques and strategies for hernia repairs, as well as the tools used to achieve these means. This text thoroughly addresses the multiple component separation techniques and options for locations of mesh repairs. It also discusses the revolution of hernia repair being facilitated by robotic surgery, which allows increased access to minimally invasive techniques for surgeons and thus increased access to minimally invasive surgical repairs for patients. This manual will be a valuable resource for interested surgeons to understand the variety of potential approaches to individual hernias, and to individually tailor the care of the hernia patient.

Mind Shift John Parrington 2021-04-22 What makes human consciousness unique? John Parrington draws on early Russian ideas and the latest neuroscience to argue that humans went through a 'mind shift' when we developed language, and words and the shared cultural world they enabled altered our brains, and have shaped them ever since.

Edward IV, England's Forgotten Warrior King Dr. Anthony Corbet 2015-01-21 As the 100 Years War ground to its dismal end, England groaned under the misrule of Henry VI and his Lancastrian favorites. The House of York rose in rebellion; and Parliament restored York in the line of inheritance to the throne. Edward, Earl of March, triumphed at the Battle of Mortimer's Cross; Parliament asked him to be King and the people proclaimed him Edward IV. His life and legacy are chronicled in Edward IV, England's Forgotten Warrior King. For ten years, Edward struggled against repeated Lancastrian rebellions. He was driven from his kingdom by Richard, Earl of Warwick, but then he won decisive victories at the Battles of Barnet and Tewkesbury in 1471. For another twelve years, he reigned wisely with peace and prosperity, as a beloved King; but then he died at age forty one and his twelve-year-old son was proclaimed Edward V. Richard, Duke of Gloucester, seized the throne and put young Edward and his brother in the Tower of London, from where they never emerged alive. Richard III was a good King and wanted to be respected, but the people believed he had murdered the Princes in the Tower, and would not forgive him. Queen Elizabeth and Margaret Beaufort plotted with Henry Tudor, who invaded England in 1485. Henry Tudor then defeated and killed Richard III at the Battle of Bosworth Field. Henry Tudor (Henry VII) was crowned King and married Edward IV's daughter Elizabeth; the resultant Tudor dynasty would rule England for another 118 years.

Catholic Theology of Marriage in the Era of HIV and AIDS Emily Reimer-Barry 2015-04-09 Marriage for Life begins by listening to the lived experiences of Catholic, married, HIV-positive women, in order to better understand their struggles. The eight women interviewed in Chicago, Illinois, USA, shared their stories of marriage, of family life, of church involvement, and of living with HIV. Their candid reflections offer a fresh and grounded perspective on the challenges of living with HIV in a US context. After listening to and learning from these women's experiences, Reimer-Barry constructs a theology of Christian marriage that is life-giving in a world with AIDS. While Catholic teachings have developed and now affirm the equal dignity of women and men, troubling legacies of women's subordination remain embedded in liturgical practices and theological texts. Arguing that self-care is an indispensable component of a healthy marriage, Reimer-Barry constructs a life-affirming theology of marriage that is sensitive to the struggles of her collaborators. She argues that marriage for life must promote the full flourishing of both partners, respect wives as equal partners with their husbands, and offer a coherent and empowering sexual ethic. Building on the wisdom of her collaborators' lived experiences, Reimer-Barry examines the need for a more adequate Catholic response to HIV and AIDS, arguing that church communities should promote comprehensive sexual education, affirm both abstinence and condom use for HIV prevention, and actively work to reduce stigmatizing behaviors within church communities. She also unpacks the implications of marriage for life for Catholic liturgical practice, marriage preparation programs, sexual education programs, and family ministries. Modeling her method on what Pope Francis calls the "art of accompaniment," Reimer-Barry argues that Catholic theology of marriage must be renewed and updated so that all can plainly understand that marriage is for life.

Restaging the Past Angela Bartie 2020-08-17 Restaging the Past is the first edited collection devoted to the study of historical pageants in Britain, ranging from their Edwardian origins to the present day. Across Britain in the twentieth century, people succumbed to 'pageant fever'. Thousands dressed up in historical costumes and performed scenes from the history of the places where they lived, and hundreds of thousands more watched them. These pageants were one of the most significant aspects of popular engagement with the past between the 1900s and the 1970s: they took place in large cities, small towns and tiny villages, and engaged a whole range of different organised groups, including Women's Institutes, political parties, schools, churches and youth organisations. Pageants were community events, bringing large numbers of people together in a shared celebration and performance of the past; they also involved many prominent novelists, professional historians and other writers, as well as featuring repeatedly in popular and highbrow literature. Although the pageant tradition has largely died out, it deserves to be acknowledged as a key aspect of community history during a period of great social and political change. Indeed, as this book shows, some traces of 'pageant fever' remain in evidence today.

Prizing Scottish Literature Stevie Marsden 2021-02-15 This cultural history of the Saltire Society Literary Awards demonstrates the significance the awards have had within Scottish literary and cultural life. It is one piece of the wider cultural award puzzle and illustrates how, far from being parochial or niche, lesser-known awards, whose histories may be yet untold, play their own role in the circulation of cultural value through the consecration of literary value. The study of the Society's Book of the Year and First Book of the Year Awards not only highlights how important connections between literary awards and national culture and identity are within prize culture and how literary awards, and their founding institutions, can be products of the socio-political and cultural milieu in which they form, but this study also illustrates how existing literary award scholarship has only begun to scratch the surface of the complexities of the phenomenon. This book promotes a new approach to considering literary prizes, proposing that the concept of the literary awards hierarchy can contribute to emerging and developing discourses pertaining to literary, and indeed cultural, prizes more broadly.

Choked Beth Gardiner 2019-04-26 Nothing is as elemental, as essential to human life, as the air we breathe. Yet around the world, in rich countries and poor ones, it is quietly poisoning us. Air pollution prematurely kills seven million people every year, including more than one hundred thousand Americans. It is strongly linked to strokes, heart attacks, many kinds of cancer, dementia, and premature birth, among other ailments. In Choked, Beth Gardiner travels the world to tell the story of this modern-day plague, taking readers from the halls of power in Washington and the diesel-fogged London streets she walks with her daughter to Poland's coal heartland and India's gasping capital. In a gripping narrative that's alive with powerful voices and personalities, she exposes the political decisions and economic forces that have kept so many of us breathing dirty air. This is a moving, up-close look at the human toll, where we meet the scientists who have transformed our understanding of pollution's effects on the body and the ordinary people fighting for a cleaner future. In the United States, air is far cleaner than it once was. But progress has failed to keep up with the science, which tells us that even today's lower pollution levels are doing real damage. And as the Trump administration rips up the regulations that have brought us where we are, decades of gains are now at risk. Elsewhere, the problem is far worse, and choking nations like China are scrambling to replicate the achievements of an American agency—the EPA—that until recently was the envy of the world. Clean air feels like a birthright. But it can disappear in a puff of smoke if the rules that protect it are unraveled. At home and around the world, it's never been more important to understand how progress happened and what dangers might still be in store. Choked shows us that we hold the power to build a cleaner, healthier future: one in which breathing, life's most basic function, no longer carries a hidden danger.

The Content Trap Bharat Anand 2016-10-18 "My favorite book of the year."—Doug McMillon, CEO, Wal-Mart Stores Harvard Business School Professor of Strategy Bharat Anand presents an incisive new approach to digital transformation that favors fostering connectivity over focusing exclusively on content. NAMED ONE OF THE BEST BOOKS OF THE YEAR BY BLOOMBERG Companies everywhere face two major challenges today: getting noticed and getting paid. To confront these obstacles, Bharat Anand examines a range of businesses around the world, from The New York Times to The Economist, from Chinese Internet giant Tencent to Scandinavian digital trailblazer Schibsted, and from talent management to the future of education. Drawing on these stories and on the latest research in economics, strategy, and marketing, this refreshingly engaging book reveals important lessons, smashes celebrated myths, and reorients strategy. Success for flourishing companies comes not from making the best content but from recognizing how content enables customers' connectivity; it comes not from protecting the value of content at all costs but from unearthing related opportunities close by; and it comes not from mimicking competitors' best practices but from seeing choices as part of a connected whole. Digital change means that everyone today can reach and interact with others directly: We are all in the content business. But that comes with risks that Bharat Anand teaches us how to recognize and navigate. Filled with conversations with key players and in-depth dispatches from the front lines of digital change, The Content Trap is an essential new playbook for navigating the turbulent waters in which we find ourselves. Praise for The Content Trap "A masterful and thought-provoking book that has reshaped my understanding of content in the digital landscape."—Ariel Emanuel, co-CEO, WME | IMG "The Content Trap is a book filled with stories of businesses, from music companies to magazine publishers, that missed connections and could never escape the narrow views that had brought them past success. But it is also filled with stories of those who made strategic choices to strengthen the links between content and returns in their new master plans. . . . The book is a call to clear thinking and reassessing why things are the way they are."—The Wall Street Journal

Four Words for Friend Marek Kohn 2019-04-09 A compelling argument about the importance of using more than one language in today's world. In a world that has English as its global language and rapidly advancing translation technology, it's easy to assume that the need to use more than one language will diminish—but Marek Kohn argues that plural language use is more important than ever. In a divided world, it helps us to understand ourselves and others better, to live together better, and to make the most of our various cultures. Kohn, whom the Guardian has called "one of the best science writers we have," brings together perspectives from psychology, evolutionary thought, politics, literature, and everyday experience. He explores how people acquire languages; how they lose them; how they can regain them; how different languages may affect people's perceptions, their senses of self, and their relationships with each other; and how to resolve the fundamental contradiction of languages, that they exist as much to prevent communication as to make it happen.
