**Journeys through Emerging Adulthood** Alan Reifman 2022-07-29 Journeys through Emerging Adulthood takes the reader on a tour of contemporary transitions to adulthood, reporting on the latest cross-national and cross-cultural research into young adulthood and separating fact from fiction about this important life phase. Alan Reifman shows how today's youth are taking more time to enter traditional adult roles, and explores the benefits and disadvantages of this gradual emergence into adulthood. This essential textbook navigates the research that reveals the substantial variety in young people's paths to adulthood. It covers the spectrum of the young adult experience, examining the influence that parents have on their grown children's progress and identity as adults, and considering the impact of traditional milestones such as higher education, establishing a career, forming romantic relationships and becoming a parent. It examines key topics including mental health in emerging adults and the likelihood of substance abuse, and how young adults might reach out into the community through volunteerism, religious involvement and political activism. Each section includes examples and studies conducted in a range of countries, exploring how the journey to adulthood can vary according to cultural context as well as individual circumstance. The book affirms that while there is great variety in how one transitions to adulthood, there is no correct path, and most people fare well – or even thrive – in adulthood. Featuring end-of-chapter summaries, quizzes and activities, Journeys Through Emerging Adulthood provides an accessible yet comprehensive overview of this significant life stage, connecting fundamental psychological theories with modern social phenomena. Reifman's text is essential reading for both undergraduate and graduate students of psychology, human development and sociology, as well as students and researchers of any discipline interested in the path to adulthood.

**Teaching Children's Literature** Christine H. Leland 2022-11-17 Now in its third edition, this indispensable text offers a critical perspective on how to integrate children's literature into the curriculum in effective, purposeful ways. Structured around three "mantras" that build on each other—Enjoy; Dig deeply; Take action—the book is rich with real examples of teachers implementing critical pedagogy and tools to support students' development as enthusiastic readers and thinkers. The materials and practical strategies focus on issues that impact children's lives, building from students' personal experiences and cultural knowledge by using language to question the everyday world, analyze popular culture and media, understand how power relationships are socially constructed, and consider actions that can be taken to promote social justice. Each chapter features classroom vignettes showcasing the use of literature and inviting conversation; three key principles elaborating the main theme of the chapter and connecting theory with practice; and related research on the topics and their importance for curriculum. Thoroughly revised, the third edition includes new recommendations for teaching with a critical edge and exploring alternative approaches to standardized assessment. With more attention to culturally and linguistically diverse learners and addressing new topics such as censorship and controversial texts, the new edition is essential for courses on teaching children's literature and English Language Arts methods, and for every preservice elementary and middle school English teacher. A companion website to enrich and extend the text includes an annotated bibliography of literature selections, suggested text sets, resources by chapter, ideas for professional development, and recommendations for further reading.

[Doing What Works in Brief Therapy](#) Ellen K. Quick 1996-04-19 The first of its kind, Doing What Works in Brief Therapy is a guidebook to strategic solution focused therapy, a model which combines the principles and techniques of the Mental Research Institute's brief strategic therapy and the Brief Family Therapy Center's solution focused therapy. The book explains how the strategic emphasis on clarification of the problem and interruption of what does not work can complement and enhance the solution-focused emphasis on amplification of what does work. The text reviews the theory and presents specific treatment techniques. Case examples illustrate how the model has been used in brief, intermittent, and single-session therapy in a managed care setting. Brief psychotherapy doesn't have to result in chronic frustration for the therapist or superficial, second-rate care for the client. This book presents an approach that is upbeat, practical, and eminently workable in managed care. The reader learns to focus on critical issues with exquisite precision and to construct creative, individualized interventions that amplify what works and interrupt what does not. Integrates strategic therapy and solution focused therapy Includes guidelines for intervention and when to do what Provides applications for couples: indications for separate or joint sessions Considers both therapy and medication as successful and unsuccessful solutions Features excerpts and clinically rich examples

**Varieties of Southern Religious History** Regina D. Sullivan 2015-04-22 Comprising essays written by former students of Donald G. Mathews, a distinguished historian of religion in the South, *Varieties of Southern Religious History* offers rich insight into the social and cultural history of the United States. Fifteen essays, edited by Regina D. Sullivan and Monte Harrell Hampton, offer fresh and insightful interpretations in the fields of U. S. religious history, women's history, and African American history from the colonial era to the twentieth century. Emerging scholars as well as established authors examine a range of topics on the cultural and social history of the South and the religious history of the United States. Essays on new topics include a consideration of Kentucky Presbyterians and their reaction to the rising pluralism of the early nineteenth century. Gerald Wilson offers an analysis of anti-Catholic bias in North Carolina during the twentieth century, and Mary Frederickson examines the rhetoric of death in contemporary correspondence. There are also reinterpretations of subjects such as late-eighteenth-century Ohio Valley missionaries Lorenzo and Peggy Dow, a recontextualization of Millerism, and new scholarship on the appeal of spiritualism in the South. Historians of U.S. women examine how individuals struggled with gender conventions in the late nineteenth and early twentieth centuries. Robert Martin and Cheryl Junk, touching on how women struggled with the gender convictions, discuss Anne Wittenmyer and Frances Bumpass, respectively, demonstrating how religious ideology both provided space for these women to move into new roles and yet limited their activities to specific realms. Emily Bingham offers a study of how her forebear Henrietta Bingham challenged gender roles in the early twentieth century. Historians of African American history offer provocative revisions of key topics. Larry Tise explores the complex religious, social, and political issues faced by late-eighteenth-century slaveholding Quakers. Monte Hampton traces the transition of the African Methodist Episcopal Church in Fayetteville, North Carolina, from a biracial congregation to an all-black church by 1835. Wayne Durrill and Thomas Mainwaring present reinterpretations of well-studied subjects: the Nat Turner rebellion and the Underground Railroad. This collection provides fresh insight into a variety of topics in honor of Donald G. Mathews and his legacy as a scholar of southern religion.

*Methods of Family Research* Irving E. Sigel 2014-02-24 These companion volumes provide a "behind the scenes" look into the personal experiences of researchers in an effort to eliminate the lack of communication surrounding family research methodology. They show how the researchers achieved their results and why they chose particular methodologies over others. These volumes present more than just findings -- they present the real experiences of the authors in their own styles and personalities, exposing the problems, mistakes, and concerns they experienced during their research projects. Volume I presents the experiences of researchers into typical normative populations. Volume II describes work with clinical, atypical populations.

Handbook of Field Experiments Esther Duflo 2017-03-21 *Handbook of Field Experiments* explains how to conduct experimental research, presents a catalog on what research has uncovered thus far, and describes which areas remain to be explored. The section on methodology will be of particular interest to scholars working with experimental methods. Among substantive findings, contributors report on a body of results in areas from politics, to education, and firm productivity, demonstrating the power of these methods, while shedding light on issues such as robustness and external validity. Separating itself from circumscribed debates of specialists, this volume surpasses in usefulness the many journal articles and narrowly-defined books written by practitioners. Balances methodological insights with analyses of principal findings and suggestions for further research Appeals broadly to social scientists seeking to develop an expertise in field experiments Strives to be analytically rigorous Written in language that is accessible to graduate students and non-specialist economists

**Churchill** Buckley Barry Barrett 2000 At the close of the 20th C., the formal end of a period strongly influenced by Winston S. Churchill as well as other political giants such as Stalin, Hitler, Mao Tse-Tung, and FDR, scholars continued to discuss and evaluate Churchill and will continue to do so into the 21st C. Many claim he was a Renaissance man who blended an unusual genius for action, writing, art, politics, and statesmanship, while others would excoriate him for his weaknesses. Aimed at a general audience of academics and armchair historians, this bibliography briefly describes and evaluates a wide selection of books in English by and about Winston S. Churchill. It includes books published since the late 1890s and is limited to works that are readily available. It excludes such items as theses and dissertations, government documents, manuscripts, and papers, and hard-to-locate ephemeral items such as pamphlets and public program notes, although a number of the titles covered are anthologies of these ephemeral materials. The titles covered provide countless leads for those wishing to pursue their research further. This book provides a good beginning.

**Power Trips and Other Journeys** Jean Bethke Elshtain 1990 Each chapter of this book treats a particular historical or contemporary topic of civic concern. Some are centered on current family crises and issues (the "family wage," child abuse, the "new eugenics") while others look to the wider national and international polity. Yet each, insistently, returns to common themes: the many faces and forms of power; struggles for autonomy; the need for human sociality and community. Elshtain's essays on controversial domestic subjects demonstrate her independence of mind, her understanding of politics as the art of the possible, and her openness to debate. In the last section, related essays on women's power and powerlessness, on patriotism, and on just war track a movement from domestic politics to foreign affairs. They are cautionary tales which simultaneously express realizable hopes and honor those, like the Mothers of the Disappeared in Argentina, who have taught us, through their desperation and triumph, what it means to fashion a politics of hope and justice against a politics of vengeance and despair.

*Health Care Off the Books* Danielle T. Raudenbush 2020-02-11 Millions of low-income African Americans in the United States lack access to health care. How do they treat their health care problems? In *Health Care Off the Books*, Danielle T. Raudenbush provides an answer that challenges public perceptions and prior scholarly work. Informed by three and a half years of fieldwork in a public housing development, Raudenbush shows how residents who face obstacles to health care gain access to pharmaceutical drugs, medical equipment, physician reference manuals, and insurance cards by mobilizing social networks that include not only their neighbors but also local physicians. However, membership in these social networks is not universal, and some residents are forced to turn to a robust street market to obtain medicine. For others, health problems simply go untreated. Raudenbush reconceptualizes U.S. health care as a formal-informal hybrid system and explains why many residents who do have access to health services also turn to informal strategies to treat their health problems. While the practices described in the book may at times be beneficial to people's health, they also have the potential to do serious harm. By understanding this hybrid system, we can evaluate its effects and gain new insight into the sources of social and racial disparities in health outcomes.
