Tenancy Law and Housing Policy in Europe Christoph U. Schmid 2018-01-26 Tenancy law has developed in all EU member states for decades, or even centuries, but constitutes a widely blank space in comparative and European law. This book fills an important gap in the literature by considering the diverse and complex panorama of housing policies, markets and their legal regulation across Europe. Expert contributors argue that that while unification is neither politically desired nor opportune, a European recommendation of best practices including draft rules and default contracts implementing a regulatory equilibrium would be a rewarding step forward.

Rent Control in North America and Four European Countries William Smith 2020-02-18 Rent control, the governmental regulation of the level of payment and tenure rights for rental housing, occupies a small but unique niche within the broad domain of public regulation of markets. The price of housing cannot be regulated by establishing a single price for a given level of quality, as other commodities such as electricity and sugar have been regulated at various times. Rent regulation requires that a price level be established for each individual housing unit, which in turn implies a level of complexity in structure and oversight that is unequaled. Housing provides a sense of security, defines our financial and emotional well-being, and influences our self-definition. Not surprisingly, attempts to regulate its price arouse intense controversy. Residential rent control is praised as a guarantor of affordable housing, excoriated as an indefensible distortion of the market, and both admired and feared as an attempt to transform the very meaning of housing access and ownership. This book provides a thorough assessment of the evolution of rent regulation in North American cities. Contributors sketch rent control's origins, legal status, economic impacts, political dynamics, and social meaning. Case studies of rent regulation in specific North American cities from New York and Washington, DC, to Berkeley and Toronto are also presented. This is an important primer for students, advocates, and practitioners of housing policy and provides essential insights on the intersection of government and markets.

Poor Housing Josh Brandon 2017-01-18T00:00:00Z Across Canada, there is a severe shortage of decent quality housing that is affordable to those with low incomes, and much of the housing that is available is inadequate, even appalling. The poor condition of housing for those below the poverty line adds to the weight of the complex poverty they already endure, which includes worsening health, adversely affected education and neighbourhoods that are more prone to crime and violence. Using Winnipeg, Manitoba, as an example, Poor Housing examines the real-life circumstances of low-income people who are forced to live in these conditions. Contributing authors examine some of the challenges faced by low-income people in poor housing, including difficulties with landlords who abuse their power, bedbugs, racism and discrimination and a wide range of other social and psychological effects. Other selections consider the particular housing problems faced by Aboriginal people and by newcomers to Winnipeg as well as the challenges faced by individuals living in rooming houses. A central theme in the collection is that the private, for-profit housing market cannot meet the housing needs of low-income Canadians, and, therefore, governments must intervene and provide subsidies. But all levels of government have shown a consistent unwillingness to invest in decent housing for low-income people. The irony is that the social costs of poor housing and the complex poverty of which it is a part are almost certainly greater than the costs of investing in subsidized social housing and related anti-poverty measures. Finally, the authors describe a number of creative and successful housing strategies for low-income people in Winnipeg, including Aboriginal housing co-ops, a revitalized 1960s-style public housing complex and a highly creative repurposing of an inner-city church into supported social housing. In these successful cases, communities and governments have worked cooperatively to good effect.

Modern Studies in Property Law - Volume 7 Nicholas Hopkins 2013-07-31 This book contains a collection of peer reviewed papers presented at the ninth biennial Modern Studies in Property Law conference held at the University of Southampton in March 2012. It is the 7th volume to be

published under the name of the conference. The conference and its published proceedings have become an established forum for property lawyers from around the world to showcase current research in the discipline. This collection reflects both the breadth of modern research in property law and its international dimensions. Incorporating a keynote address by Lord Walker of Gestingthorpe, retired Justice of the Supreme Court, on 'The Saga of Strasbourg and Social Housing,' a number of chapters reveal the burgeoning influence of human rights in property law. Other contributions illustrate an enduring need to question and explore fundamental concepts of the subject alongside new and emerging areas of study. Collectively the chapters demonstrate the importance and relevance of property research in addressing a wide range of contemporary issues. Practice Notes Residential Tenancies Richard Colbey 2001-06-11 Since the previous edition, the Housing Act 1996 has come into force and the application of this Act, which may not have been entirely successful in its aim of simplifying the law, is closely considered here. The radical procedural changes, resulting from both the CPR and provisions specific to possession cases are covered in detail. This edition contains a new chapter on the landlords statutory obligations during the tenancy. This concentrates on matters that are of tremendous practical importance particularly to landlords, such as the Gas Safety Regulations and the Furniture and Fittings Regulations, yet which are overlooked by most works in this field. The enlarged section on Housing Benefit also reflects the authors belief that this book should primarily be a tool for use in the real world rather than a learned treatise.

Law as Change Paul Babie 2014 In 2011, Professor Adrian J Bradbrook retired from a distinguished scholarly career spanning over forty years. During this time, he made a significant contribution to teaching and scholarship not only in property law — specifically to leasehold tenancies law and easements and restrictive covenants — but also to energy law, especially the emerging and growing field of solar energy. This book brings together those people who worked closely with Bradbrook, each an expert in their own right, to honour a career by critically engaging with the contributions Bradbrook made to property and energy law. Each author has chosen a topic that both fits with their own cutting-edge research and explores the related contributions made by Bradbrook. Most unusually, this collection ranges widely across property law, energy law and human rights.

Residential Tenancies Laura Farrell 2018-12-20 Ireland is in a housing and rental crisis. With spiralling rents and a lack of supply comes new challenges for tenants and landlords. Along with this, the legislative changes to the Residential Tenancies Act 2004 are being made in a piecemeal fashion. With so many changes, Residential Tenancies is a much needed exposition of the current law. It provides a clear and comprehensive statement of the law regulating private and social leases of dwellings in Ireland and explains the dispute resolution mechanisms of the Residential Tenancies Board, appeals, and enforcement. At the centre of the book are the implications of the Residential Tenancies Act 2004, which was enacted to provide a simple and quick way to resolve disputes. However the provisions of the Residential Tenancies Act are technical, confusing, and give rise to what has been referred to repeatedly in the High Court as regrettable difficulties of interpretation. Residential Tenancies provides expert guidance and insight for practitioners and all those who have to navigate the provisions of the Residential Tenancies Act, 2004 (as amended). The text aims to 'see around corners' in the legislation, to answer particular difficulties that might prompt readers to turn to its pages. It gives practical help including step-by-step guidance to tackle the difficulties of interpretation and the wide range of changes and challenges, such as the obligations of landlords and tenants, changes in notice periods for termination and rent reviews, and dispute resolution. Along with this, the book also includes many useful resources including a comprehensive appendix, which includes a sample residential letting agreement, a range of sample notices of termination (to deal with all permitted reasons for termination), and a sample rent review notice. These make it ideal for solicitors and barristers practicing in this area, as well as letting agents and members of the public, either landlords or tenants who wish to be well informed of their rights and obligations.

Housing in 21st-Century Australia Dr Rae Dufty-Jones 2015-10-28 The studies presented in this text provide a unique insight into a range of housing production, consumption and policy issues that, while based in Australia, have implications that go beyond this national context. For instance how do suburban-based societies adjust to the realities of aging populations, anthropogenic climate change and the significant implications such change has for housing? How has policy been translated and assembled in specific national contexts? Similarly, what are the significantly different policy settings the production and consumption of housing in a post-Global Financial Crisis period require? Framed in this way this book accounts for and responds to some of the key housing issues of the 21st century.

Landlord and Tenant Law Susan Bright 2006-10-11 This unique collection of essays, written by leading practitioners, policy makers and academics, looks at patterns of landlord and tenant law: past, present and future. Each sector is explored - commercial, long residential, housing, and agricultural - by taking a look backwards and forwards. The chapters explore the role that legislative, judicial, and policy developments, and market forces have played, and will continue to play, in shaping the law. Two chapters are devoted to the seminal case of Street v Mountford and its contemporary significance. A comparison is also made with the position in Australia and the United States. The book provides a scholarly reflection on the principles of leasehold law that will be of interest to practitioners, academics, and students of landlord and tenant law.
